

Actionable Audit Report Summary

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
BDX	2022-04-01	HIGH	SPINOFF	MS_MISSING_EVENT	BD completed the Embecta spin-off on Apr. 1, 2022, distributing one Embecta share for every five BD shares. BD announced the Embecta spin-off would be completed at 12:01 a.m. ET on Apr. 1, 2022, with BD distributing one Embecta share for every five BD shares; Embecta filings confirm the one-for-five distribution and Apr. 1, 2022 completion. No ordinary dividend, split, merger, rights issue, or separate same-day news catalyst was needed to explain the vendor difference. Input row math supports yFinance: Massive has no event marker while yFinance records yf_div_split=sp:1.025, ms_return=-0.013158, yf_return=0.011513, diff_return=0.024671, and yFinance explicit event return 0.025000 matches the confirmed spin-off impact. Massive is missing the spin-off adjustment, so yFinance is the economically correct source.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.025	-0.013158	0.011513
BDX	2026-02-10	HIGH	SPINOFF	MS_MISSING_EVENT	BD completed the Biosciences and Diagnostic Solutions spin-off and Waters combination, with BD shareholders receiving about 0.135 Waters shares per BD share. BD completed the spin-off of its Biosciences and Diagnostic Solutions business and combination with Waters on Feb. 9, 2026. The SEC 8-K states BD distributed SpinCo shares to Feb. 5 record-date holders and each SpinCo share converted into 0.135343148384084 Waters shares; the transaction press release states BD shareholders received about 0.135 Waters shares per BD share and BD received \$4 billion. No ordinary cash dividend, split, rights issue, or unrelated same-day corporate action was identified. Input row math supports yFinance: Massive has no event marker while yFinance records yf_div_split=sp:1.272, ms_return=-0.172188, yf_return=0.052977, diff_return=0.225165, and yFinance explicit event return 0.272000 captures the spin-off/merger value that Massive does not. Massive is missing the spin-off adjustment, so yFinance is the economically correct source.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.272	-0.172188	0.052977
BWA	2023-07-05	HIGH	SPINOFF	MS_MISSING_EVENT	BorgWarner completed the PHINIA spin-off, with PHINIA beginning regular-way trading on July 5, 2023. BorgWarner announced completion of the PHINIA spin-off on July 3, 2023, and PHINIA confirmed it began NYSE trading on July 5, 2023 after separation from BorgWarner. The input row math shows yFinance includes sp:1.136 while Massive has no dividend/split entry; yFinance return is 11.7638 percentage points above Massive, directionally matching the 13.6% spin-off adjustment bucket. Massive appears to be missing	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the		sp:1.136	-0.135016	-0.017378

					the spin-off adjustment, making yFinance economically closer for this row.	appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
CF	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	CF Industries had a \$0.50 quarterly cash dividend on the May 14, 2024 ex-dividend date. CF Industries announced that its board declared a \$0.50 per-share quarterly dividend, a 25% increase from the prior quarterly dividend. Independent dividend-history data lists a \$0.500 dividend for May 14, 2024 with May 31, 2024 payment timing. The input row math shows yFinance includes ca:0.5 while Massive has no dividend/split entry; the return difference of +0.6790 percentage points closely matches the +0.6733% dividend-impact bucket. Massive appears to be missing the real dividend adjustment, making yFinance economically closer for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		ca:0.5	0.001616	0.008406
CMCSA	2026-01-05	HIGH	SPINOFF	MS_MISSING_EVENT	Comcast completed the Versant Media Group spin-off, with Versant beginning regular-way Nasdaq trading on January 5, 2026. Comcast announced completion of the Versant Media Group separation effective January 2, 2026, with Versant beginning regular-way Nasdaq trading on January 5, 2026. Comcast shareholders received one Versant share for every 25 Comcast shares held on the record date. The input row math shows yFinance includes sp:1.067 while Massive has no dividend/split entry; the +6.3802 percentage-point return difference is close to the +6.7% spin-off adjustment bucket. Massive appears to be missing the spin-off adjustment, making yFinance economically closer for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.067	-0.047732	0.01607
DHR	2023-10-02	HIGH	SPINOFF	MS_MISSING_EVENT	Danaher completed the Veralto spin-off, with Veralto beginning regular-way trading on October 2, 2023. Danaher announced completion of the Veralto separation on September 30, 2023, with Veralto beginning regular-way NYSE trading on October 2, 2023. Danaher shareholders received one Veralto share for every three Danaher shares held on the record date. The input row math shows yFinance includes sp:1.128 while Massive has no dividend/split entry; the +11.0273 percentage-point return difference is directionally consistent with the +12.8% spin-off adjustment bucket. Massive appears to be missing the spin-off adjustment, making yFinance economically closer for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.128	-0.138493	-0.02822
ED	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	Consolidated Edison had a \$0.83 quarterly cash dividend on the May 14, 2024 ex-dividend date. Consolidated Edison dividend-history sources list a \$0.83 quarterly cash dividend with May 14, 2024 ex-dividend date and June 14, 2024 payment date. The input row math shows yFinance includes ca:0.83 while	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an		ca:0.83	-0.010242	-0.001756

Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
EXC	2022-02-02	HIGH	SPINOFF	MS_MISSING_EVENT	Exelon completed the Constellation Energy spin-off, with regular-way trading beginning on February 2, 2022. Exelon completed the separation of Constellation Energy on February 1, 2022, and both companies began regular-way trading on February 2, 2022. Constellation also confirmed Exelon shareholders received one Constellation share for every three Exelon shares held. The input row math shows yFinance includes sp:1.402 while Massive has no dividend/split entry; the +29.7938 percentage-point return difference is directionally consistent with the +40.2% spin-off adjustment bucket. Massive appears to be missing the spin-off adjustment, making yFinance economically closer for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.402	-0.258862	0.039075
FCX	2022-10-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan had a \$0.15 total quarterly cash dividend, composed of \$0.075 base and \$0.075 variable components, for the 2022-10-13 dividend timing. Freeport-McMoRan dividend sources support a \$0.15 total quarterly cash dividend for the 2022-10-13 dividend timing, consistent with FCX's performance-based payout framework of a \$0.075 base dividend plus a \$0.075 variable dividend. The input row math shows Massive includes only ca:0.075 while yFinance includes ca:0.15; the return difference of 0.002668 closely matches the missing half of the dividend impact. Massive appears to record only the base component and omit the variable component, making yFinance economically closer for this row.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	ca:0.075	ca:0.15	0.020685	0.023353
FCX	2023-01-12	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan had a \$0.15 total quarterly cash dividend, composed of \$0.075 base and \$0.075 variable components, for the 2023-01-12 dividend timing. Freeport-McMoRan dividend sources support a \$0.15 total quarterly cash dividend for the 2023-01-12 dividend timing, consistent with FCX's performance-based payout framework of a \$0.075 base dividend plus a \$0.075 variable dividend. The input row math shows Massive includes only ca:0.075 while yFinance includes ca:0.15; the return difference of 0.001655 closely matches the missing half of the dividend impact. Massive appears to record only the base component and omit the variable component, making yFinance economically closer for this row.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2026-01-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan had a \$0.15 total quarterly cash dividend, composed of \$0.075 base and \$0.075 variable components, for the 2026-01-15 dividend timing. Freeport-McMoRan dividend sources support a \$0.15 total quarterly cash dividend for the 2026-01-15 dividend timing, consistent with FCX's performance-based payout framework of a \$0.075 base dividend plus a \$0.075 variable dividend. The input row math shows Massive includes only ca:0.075 while yFinance includes ca:0.15; the return difference of 0.001239 closely matches the missing half of the dividend impact. Massive appears to record only the base component and omit the variable component, making yFinance economically closer for this row.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	ca:0.075	ca:0.15	-0.005226	-0.003987
FCX	2026-04-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan had a \$0.15 total quarterly cash dividend, composed of \$0.075 base and \$0.075 variable components, for the 2026-04-15 dividend timing. Freeport-McMoRan dividend sources support a \$0.15 total quarterly cash dividend for the 2026-04-15 dividend timing, consistent with FCX's performance-based payout framework of a \$0.075 base dividend plus a \$0.075 variable dividend. The input row math shows Massive includes only ca:0.075 while yFinance includes ca:0.15; the return difference of 0.001109 closely matches the missing half of the dividend impact. Massive appears to record only the base component and omit the variable component, making yFinance economically closer for this row.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	ca:0.075	ca:0.15	0.007405	0.008514
GM	2024-02-29	HIGH	DISTRIBUTION	MS_MISSING_EVENT	General Motors had a \$0.12 quarterly cash dividend on the February 29, 2024 ex-dividend date. General Motors stock-information and dividend-history sources list a \$0.12 dividend with February 29, 2024 ex-dividend date, March 1 record date, and March 14 payment date. The input row math shows yFinance includes ca:0.12 while Massive has no dividend/split entry; the +0.2988 percentage-point return difference closely matches the +0.2953% dividend-impact bucket. Massive appears to be missing the real dividend adjustment, making yFinance economically closer for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		ca:0.12	0.008614	0.011602

MRK	2021-06-03	HIGH	SPINOFF	MS_MISSING_EVENT	Merck completed the Organon spinoff on 2021-06-03. Merck holders received Organon shares, and the distribution required a historical return adjustment. Merck completed the Organon spinoff on 2021-06-03, and OCC documentation describes the distribution ratio as 0.10 Organon share for each Merck share held. The input row math shows yFinance includes a spinoff adjustment while Massive has no event; the resulting return gap of about 4.6760% is consistent with a material spinoff adjustment. yFinance is therefore the better-supported source for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.048	-0.025834	0.020926
O	2021-11-15	HIGH	SPINOFF	MS_MISSING_EVENT	Realty Income completed the Orion Office REIT spinoff on 2021-11-15, distributing one Orion share for every ten Realty Income shares. Realty Income completed the Orion Office REIT spinoff on 2021-11-15. Realty Income's release and OCC documentation both describe a distribution ratio of 0.10 Orion share for each Realty Income share held. The input row math shows yFinance includes a spinoff adjustment while Massive has no event; the return gap of about 3.1296% is consistent with a material spinoff adjustment. yFinance is therefore the better-supported source for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.032	-0.021996	0.0093
T	2022-04-11	HIGH	SPINOFF	MS_MISSING_EVENT	AT&T separated WarnerMedia and combined it with Discovery to create Warner Bros. Discovery, with WBD beginning regular trading on 2022-04-11. The	Massive is missing the event/adjustment needed to explain the return difference.		sp:1.324	-0.186827	0.076641

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					transaction required a material historical adjustment. AT&T completed the WarnerMedia separation and combination with Discovery at the close of 2022-04-08, with WBD beginning trading on Nasdaq on 2022-04-11. AT&T's cost-basis guide and the transaction release document the distribution and WBD exchange mechanics. The input row math shows yFinance includes a spinoff adjustment while Massive has no event; the return gap of about 26.3468% is consistent with a material spinoff adjustment. yFinance is therefore the better-supported source for this row.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
TEL	2024-11-22	HIGH	DISTRIBUTION	MS_EXTRA_EVENT	TE Connectivity had one \$0.65 quarterly dividend with record date 2024-11-22 and payment date 2024-12-06. Massive appears to double count the ordinary dividend. TE Connectivity's 2024 proxy statement describes four equal quarterly installments of \$0.65, with the third installment payable 2024-12-06 to shareholders of record on 2024-11-22. Independent dividend history also lists a single \$0.65 dividend on 2024-11-22. The input row math shows Massive includes ca:0.65 twice while yFinance includes ca:0.65 once; the excess return impact is about one additional \$0.65 dividend. yFinance is therefore the better-supported source for this row.	Massive records an extra corporate-action event or excessive event amount. Massive appears incorrect because it captured an extra same-day corporate-action event or event amount, and the excess event-return piece explains the Massive/yFinance return difference. Remove the unsupported Massive event amount or duplicate event, then rebuild the adjusted close and adjusted return chain.	ca:0.65 ca:0.65	ca:0.65	0.020353	0.015947
ULTA	2023-05-30	HIGH	UNKNOWN	CLOSE_REVERSAL	No real-world corporate-action event was identified for Ulta Beauty on 2023-05-30. The discrepancy pattern is consistent with a short-lived Massive close or timing issue. Independent corporate-action sources show no Ulta Beauty dividend or stock split on 2023-05-30, and neither input row field contains a dividend or split. The input row math shows a return difference of about +1.3015% that is substantially reversed by the opposite-sign difference on the next reviewed row. Because the source audit marks the Massive close as the likely incorrect side, yFinance is the better-supported source for this close-reversal pair.	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.			-0.032217	-0.019202
ULTA	2023-05-31	HIGH	UNKNOWN	CLOSE_REVERSAL	No real-world corporate-action event was identified for Ulta Beauty on 2023-05-31. The discrepancy pattern reverses the prior reviewed row and points to a Massive close or timing issue. Independent corporate-action sources show no Ulta Beauty dividend or stock split on 2023-05-31, and neither input row field contains a dividend or split. The input row math shows a return difference of about -1.3371%, which offsets the prior reviewed row's positive difference. Because the source audit marks the Massive close as the likely incorrect side, yFinance is the better-supported source for this reversal leg.	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.			0.007622	-0.00575

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
ZBH	2022-03-01	HIGH	SPINOFF	MS_MISSING_EVENT	Zimmer Biomet completed the spin-off of ZimVie on March 1, 2022, distributing ZimVie shares to ZBH shareholders at a one-for-ten ratio. Zimmer Biomet completed the ZimVie spin-off on March 1, 2022. The issuer said ZBH holders received one ZimVie share for every ten ZBH shares held on the February 15, 2022 record date; ZimVie investor FAQs independently confirm the same distribution timing and ratio. The input row math shows yFinance includes an approximately 3.00% spin-off return component while Massive has no corresponding div/split event, producing the 2.928 percentage-point return difference. Because this was a real-world spin-off distribution and yFinance reflects the event while Massive omits it, yFinance appears economically correct for this row.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.03	-0.02398	0.005301
