

Non-Actionable Audit Report Summary

Audited source1: Massive
Comparison source2: yFinance

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
ALLE	2025-09-15		DISTRIBUTION	SOURCE2_MISSING_EVENT	Allegion \$0.51 quarterly cash dividend with 09/15/2025 record/ex-dividend timing and 09/30/2025 payable date. Allegion investor relations dividend history shows a \$0.51 dividend with 09/15/2025 record date and 09/30/2025 payable date, and Allegion's 09/04/2025 dividend release independently says the board declared a \$0.51 quarterly dividend payable 09/30/2025 to shareholders of record 09/15/2025. The input row math supports source1: source1_return is 0.009684, source2_return is 0.006742, and diff_return is +0.002942, meaning source1 is higher by about 29.4 bp. source1_div_split is cd:0.51, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.002914, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.002914 from the \$0.51 cash distribution reconciles to the positive diff_return, so source1 captures the real cash distribution and source2 appears to omit the event adjustment.		cd:0.51		0.009684	0.006742
ALLE	2025-12-16		DISTRIBUTION	SOURCE2_MISSING_EVENT	Allegion \$0.51 quarterly cash dividend with 12/16/2025 record/ex-dividend timing and 12/31/2025 payable date. Allegion investor relations dividend history shows a \$0.51 dividend with 12/16/2025 record date and 12/31/2025 payable date, and the Business Wire/Allegion dividend release confirms a \$0.51 quarterly dividend declared on 12/03/2025 and payable 12/31/2025 to shareholders of record 12/16/2025. The input row math supports source1: source1_return is -0.017718, source2_return is -0.020790, and diff_return is +0.003072, so source1 is higher by about 30.7 bp. source1_div_split is cd:0.51, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.003128, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.003128 from the \$0.51 cash distribution reconciles to the positive diff_return, so source1 captures the real cash distribution and source2 appears to omit the event adjustment.		cd:0.51		-0.017718	-0.02079
ALLE	2026-02-17		NEWS	HIGH_SCORE_ANOMALY	Allegion Q4 2025 earnings release and weak residential-demand news on 02/17/2026. Allegion's own Q4 2025 earnings release was issued on 02/17/2026 and reported Q4 net revenues of \$1.0332 billion, adjusted EPS of \$1.94, residential weakness, and 2026 outlook; Reuters reported the same day that Allegion missed profit estimates because weak residential security demand weighed on results. No split, spin-off, merger, rights offering, or cash distribution was identified for this date. The input row math shows				-0.09376	-0.09376

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					source1 and source2 are economically equivalent: source1_return is -0.093760, source2_return is -0.093760, diff_return is blank, source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -9.376% move is therefore a real earnings/news move reflected equally by source1 and source2, not a source1 remediation issue.					
AMCR	2024-05-01		NEWS	HIGH_SCORE_ANOMALY	Amcor fiscal Q3 2024 results and raised fiscal 2024 adjusted EPS guidance. Amcor reported fiscal third-quarter 2024 results after the 04/30/2024 close and raised fiscal 2024 adjusted EPS guidance; MarketBeat's earnings page confirms the Q3 2024 report timing and says adjusted EPS beat expectations, supporting a news/earnings catalyst for the 05/01/2024 trading move. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for 05/01/2024. The input row math shows source1 and source2 have the same adjusted return: source1_return is 0.096197, source2_return is 0.096197, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. Because the approximately +9.6197% move is reflected equally by source1 and source2, the row is a real earnings/news move rather than a source1 remediation issue.				0.096197	0.096197
AMCR	2025-08-14		NEWS	HIGH_SCORE_ANOMALY	Amcor fiscal Q4 2025 results, Berry Global integration update, and fiscal 2026 guidance. Amcor released fiscal Q4 2025 results on 08/14/2025, reporting the Berry Global acquisition close, a GAAP net loss including acquisition-related costs, and fiscal 2026 guidance; MarketBeat confirms the 08/14/2025 earnings call and links the same press release materials. No split, spin-off, merger closing adjustment, rights offering, or same-day cash distribution explains a source-specific return gap. The input row math shows source1 and source2 are economically equivalent for the reviewed return: source1_return is -0.118712, source2_return is -0.118712, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -11.8712% move is therefore a real earnings/news reaction reflected equally by source1 and source2, not a source1 data defect.				-0.118712	-0.118712
AMCR	2025-09-05		DISTRIBUTION	SOURCE2_MISSING_EVENT	Amcor \$0.1275 quarterly cash dividend with 09/05/2025 NYSE ex-dividend and record date. Amcor's fiscal Q4 2025 press release says the board declared a 12.75 cent quarterly cash dividend, with NYSE ex-dividend date 09/05/2025, record date 09/05/2025, and payment date 09/25/2025. Amcor's 2025 annual report independently confirms that on 08/14/2025 the board declared a \$0.1275 dividend payable 09/25/2025		cd:0.1275		0.009425	-0.005988

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					to shareholders of record 09/05/2025. The input row math supports source1: source1_return is 0.009425, source2_return is -0.005988, and diff_return is +0.015413, meaning source1 is higher by about 154.1 bp. source1_div_split is cd:0.1275, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.015269, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.015269 from the \$0.1275 cash dividend reconciles to the positive diff_return, so source1 captures the real distribution and source2 appears to omit the event adjustment.					
AMCR	2025-11-28		DISTRIBUTION	SOURCE2_MISSING_EVENT	Amcor \$0.13 quarterly cash dividend with 11/28/2025 record/ex-dividend timing and 12/17/2025 payable date. Amcor's November 2025 company filing states that on 11/05/2025 the board declared a \$0.13 quarterly cash dividend payable 12/17/2025 to shareholders of record 11/28/2025, and TipRanks' dividend history independently shows a 11/28/2025 dividend date and \$0.13 payment. The input row math supports source1: source1_return is 0.003534, source2_return is -0.011601, and diff_return is +0.015134, so source1 is higher by about 151.3 bp. source1_div_split is cd:0.13, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.015081, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.015081 from the \$0.13 cash dividend reconciles to the positive diff_return, so source1 captures the real distribution and source2 appears to omit the event adjustment.		cd:0.13		0.003534	-0.011601
BDX	2023-11-09		NEWS	HIGH_SCORE_ANOMALY	BD fiscal Q4 2023 results and market reaction. BD released fiscal Q4 and full-year 2023 results on 11/09/2023, reporting Q4 revenue, adjusted EPS, fiscal 2024 guidance, and strategic updates; AAll independently reported that BDX closed down 9.25% on 11/09/2023. No split, spin-off, merger, rights offering, or cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.092529, source2_return is -0.092529, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -9.2529% move is therefore a real earnings/news move reflected equally by source1 and source2, not a source1 remediation issue.				-0.092529	-0.092529
BDX	2025-05-01		NEWS	HIGH_SCORE_ANOMALY	BD fiscal Q2 2025 results with updated fiscal 2025 guidance and tariff impact. BD reported fiscal Q2 2025 results on 05/01/2025 and updated full-year fiscal 2025 guidance, including lower organic revenue growth and a tariff-related reduction to adjusted EPS guidance. The BD newsroom version confirms the same guidance changes and estimated tariff impact. No split, spin-off, merger, rights offering, or				-0.181322	-0.181322

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.181322, source2_return is -0.181322, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -18.1322% move is therefore a real earnings/guidance news move reflected equally by source1 and source2, not a source1 remediation issue.					
BKR	2021-12-07		PRICING_METHOD	CLOSE_REVERSAL	Baker Hughes listing-market transition from NYSE to Nasdaq with close-reversal pricing difference. Nasdaq Trader published a data technical notice stating that Baker Hughes common stock would begin listing and trading on Nasdaq on 12/07/2021 under the continued BKR ticker after the 12/06/2021 market close. Historical-price review did not identify a same-day dividend, split, spin-off, merger, or rights offering. The input row math shows a close-reversal/pricing issue rather than an economic event: source1_return is 0.029075, source2_return is 0.018837, and diff_return is +0.010238 on 12/07/2021, while the next reviewed row reverses with a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The listing-market transition makes a pricing-method explanation plausible, but source1 and source2 are both economically defensible because the discrepancy reverses rather than reflecting a corporate-action adjustment.				0.029075	0.018837
BKR	2021-12-08		PRICING_METHOD	CLOSE_REVERSAL	Baker Hughes post-listing-transfer close-reversal pricing difference. Nasdaq Trader's notice confirms Baker Hughes began Nasdaq trading on 12/07/2021 after its NYSE listing ended after the 12/06/2021 close, and historical-price review did not identify a dividend, split, spin-off, merger, or rights offering on 12/08/2021. The input row math shows the second leg of a close reversal: source1_return is -0.007163, source2_return is 0.002814, and diff_return is -0.009976 after the prior reviewed row had a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. Because the source1/source2 discrepancy reverses and no event-return marker exists, source1 and source2 are economically defensible and the row is a pricing-method/listing-transition artifact rather than a source1 remediation issue.				-0.007163	0.002814
BKR	2024-10-14		PRICING_METHOD	CLOSE_REVERSAL	No identified Baker Hughes corporate action or material news; minor close-reversal pricing difference. Review of Baker Hughes investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 10/14/2024. The input row math				-0.001724	-0.001591

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					shows only a very small close-reversal difference: source1_return is -0.001724, source2_return is -0.001591, and diff_return is -0.000133, while the following reviewed row reverses with a positive diff_return of similar size. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The tiny source1/source2 difference is consistent with closing-price precision or timing, not an economic event; source1 and source2 are economically equivalent for audit purposes.					
BKR	2024-10-15		PRICING_METHOD	CLOSE_REVERSAL	No identified Baker Hughes corporate action or material news; offsetting close-reversal pricing difference. Review of Baker Hughes investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 10/15/2024. The input row math is the offsetting leg of the 10/14/2024 close reversal: source1_return is -0.034941, source2_return is -0.035069, and diff_return is +0.000128 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The source1/source2 difference is immaterial and reverses across adjacent days, so source1 and source2 are economically equivalent for audit purposes.				-0.034941	-0.035069
BKR	2024-11-06		NEWS	HIGH_SCORE_ANOMALY	Broad post-election market and energy-sector rally. AP and Reuters/Investing reported a broad U.S. stock-market rally on 11/06/2024 after the U.S. presidential election, with investors pricing lower taxes, deregulation, and sector rotation; Reuters/Investing specifically noted the S&P 500 energy index rose sharply. Baker Hughes investor news did not identify a same-day split, spin-off, merger, rights offering, or cash distribution. The input row math shows source1 and source2 are economically equivalent: source1_return is 0.107828, source2_return is 0.107828, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately +10.7828% move is therefore a broad market/news move reflected equally by source1 and source2, not a source1 data issue.				0.107828	0.107828
BKR	2024-11-08		PRICING_METHOD	CLOSE_REVERSAL	No same-day Baker Hughes event; minor close-reversal pricing difference. Baker Hughes declared a \$0.21 quarterly dividend payable 11/14/2024 to holders of record 11/04/2024, so the dividend timing does not support a 11/08/2024 event adjustment, and historical-price review did not identify a same-day split, spin-off, merger, rights offering, or material company news. The input row math shows a tiny close-reversal difference: source1_return is -0.001972, source2_return is -0.001856, and diff_return is				-0.001972	-0.001856

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					-0.000116, while the next reviewed row reverses with a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The row is consistent with immaterial close precision or timing differences, so source1 and source2 are economically equivalent for audit purposes.					
BKR	2024-11-11		PRICING_METHOD	CLOSE_REVERSAL	No same-day Baker Hughes event; offsetting close-reversal pricing difference. Baker Hughes' October 2024 dividend release places the quarterly dividend record date on 11/04/2024 and payable date on 11/14/2024, not 11/11/2024, and historical-price review did not identify a same-day split, spin-off, merger, rights offering, or material company news. The input row math is the offsetting leg of a close reversal: source1_return is 0.025456, source2_return is 0.025337, and diff_return is +0.000119 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The source1/source2 difference is immaterial and reverses, so source1 and source2 are economically equivalent for audit purposes.			0.025456	0.025337	
BKR	2025-07-23		NEWS	HIGH_SCORE_ANOMALY	Baker Hughes Q2 2025 earnings release and earnings-call reaction. Baker Hughes filed an 8-K stating it issued Q2 2025 results on 07/22/2025 and would hold its earnings call on 07/23/2025, and MarketBeat's earnings page independently covers the Q2 2025 earnings report. No same-day split, spin-off, merger, rights offering, or cash distribution was identified for 07/23/2025. The input row math shows source1 and source2 are economically equivalent: source1_return is 0.116442, source2_return is 0.116442, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately +11.6442% move is therefore an earnings/news reaction reflected equally by source1 and source2, not a source1 remediation issue.			0.116442	0.116442	
BKR	2025-08-28		PRICING_METHOD	CLOSE_REVERSAL	No identified Baker Hughes corporate action or material news; minor close-reversal pricing difference. Review of Baker Hughes investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 08/28/2025. The input row math shows only a very small close-reversal difference: source1_return is 0.017530, source2_return is 0.017642, and diff_return is -0.000112, while the following reviewed row reverses with a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The tiny source1/source2 difference is consistent with closing-price precision or			0.01753	0.017642	

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					timing, not an economic event; source1 and source2 are economically equivalent for audit purposes.					
BKR	2025-08-29		PRICING_METHOD	CLOSE_REVERSAL	No identified Baker Hughes corporate action or material news; offsetting close-reversal pricing difference. Review of Baker Hughes investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 08/29/2025. The input row math is the offsetting leg of the 08/28/2025 close reversal: source1_return is -0.003621, source2_return is -0.003730, and diff_return is +0.000109 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The source1/source2 difference is immaterial and reverses across adjacent days, so source1 and source2 are economically equivalent for audit purposes.				-0.003621	-0.00373
BWA	2023-11-02		NEWS	HIGH_SCORE_ANOMALY	BorgWarner Q3 2023 results and reduced 2023 revenue outlook. BorgWarner reported Q3 2023 results on 11/02/2023 and updated full-year sales, margin, and EPS guidance; Reuters/Investing independently reported that BorgWarner cut its 2023 revenue outlook because of foreign-currency pressure including a weakening Chinese yuan. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.130693, source2_return is -0.130693, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -13.0693% move is therefore a real earnings/guidance news reaction reflected equally by source1 and source2, not a source1 remediation issue.				-0.130693	-0.130693
BWA	2026-02-11		NEWS	HIGH_SCORE_ANOMALY	BorgWarner Q4 2025 results, 2026 guidance, shareholder returns, and data-center turbine-generator award. BorgWarner reported Q4 and full-year 2025 results on 02/11/2026, including adjusted EPS of \$1.35 for Q4, full-year guidance, shareholder returns, and a strategic data-center turbine-generator award; its SEC 8-K confirms the same date and attached earnings release. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is 0.224528, source2_return is 0.224528, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately +22.4528% move is therefore a real				0.224528	0.224528

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					earnings/business-news reaction reflected equally by source1 and source2, not a source1 remediation issue.					
CB	2025-09-12		DISTRIBUTION	SOURCE2_MISSING_EVENT	Chubb \$0.97 quarterly cash dividend with 09/12/2025 record/ex-dividend timing and 10/03/2025 payable date. Chubb's investor-relations dividend history lists a regular cash dividend of \$0.97 with 09/12/2025 record date and 10/03/2025 payable date, and StockAnalysis independently lists a \$0.970 ex-dividend date of 09/12/2025 with the same record and pay dates. The input row math supports source1: source1_return is -0.013514, source2_return is -0.016897, and diff_return is +0.003383, meaning source1 is higher by about 33.8 bp. source1_div_split is cd:0.97, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.003429, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.003429 from the \$0.97 cash dividend reconciles to the positive diff_return, so source1 captures the real cash distribution and source2 appears to omit the event adjustment.		cd:0.97		-0.013514	-0.016897
CB	2025-12-12		DISTRIBUTION	SOURCE2_MISSING_EVENT	Chubb \$0.97 quarterly cash dividend with 12/12/2025 record/ex-dividend timing and 01/02/2026 payable date. Chubb's 11/20/2025 dividend release states that the board declared a \$0.97 quarterly dividend payable 01/02/2026 to shareholders of record at the close of business on 12/12/2025, and Chubb's investor-relations dividend history independently lists the same \$0.97 regular cash dividend with 12/12/2025 record date and 01/02/2026 payable date. The input row math supports source1: source1_return is 0.011344, source2_return is 0.008138, and diff_return is +0.003206, meaning source1 is higher by about 32.1 bp. source1_div_split is cd:0.97, source2_div_split is blank, has_div_split_mismatch is true, source1_div_split_factor_explicit is 1.003170, and source2_div_split_factor_explicit is 1.0. The expected return impact of about +0.003170 from the \$0.97 cash dividend reconciles to the positive diff_return, so source1 captures the real cash distribution and source2 appears to omit the event adjustment.		cd:0.97		0.011344	0.008138
CMCSA	2021-09-14		NEWS	HIGH_SCORE_ANOMALY	Comcast broadband-growth warning and related stock decline. Motley Fool and Next TV both reported that Comcast shares fell sharply on 09/14/2021 after CFO Michael Cavanagh warned of slower broadband subscriber additions. No split, spin-off, merger, rights offering, or cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.073037, source2_return is -0.073036, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -7.3037% move is therefore a real				-0.073037	-0.073036

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					company-news reaction reflected equally by source1 and source2, not a source1 remediation issue.					
CMCSA	2024-03-12		PRICING_METHOD	CLOSE_REVERSAL	No identified Comcast corporate action or material news; minor close-reversal pricing difference. Review of Comcast investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 03/12/2024. The input row math shows a tiny close-reversal difference: source1_return is -0.008153, source2_return is -0.008038, and diff_return is -0.000115, while the next reviewed row reverses with a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The source1/source2 difference is immaterial and reverses across adjacent days, so source1 and source2 are economically equivalent for audit purposes.				-0.008153	-0.008038
CMCSA	2024-03-13		PRICING_METHOD	CLOSE_REVERSAL	No identified Comcast corporate action or material news; offsetting close-reversal pricing difference. Review of Comcast investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 03/13/2024. The input row math is the offsetting leg of a close reversal: source1_return is 0.002200, source2_return is 0.002084, and diff_return is +0.000116 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The difference is immaterial and reverses, so source1 and source2 are economically equivalent for audit purposes.				0.0022	0.002084
CMCSA	2024-10-22		PRICING_METHOD	CLOSE_REVERSAL	No identified Comcast corporate action or material news; minor close-reversal pricing difference. Review of Comcast investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 10/22/2024. The input row math shows a very small close-reversal difference: source1_return is 0.025043, source2_return is 0.025167, and diff_return is -0.000123, while the next reviewed row reverses with a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The source1/source2 difference is immaterial and reverses across adjacent days, so source1 and source2 are economically equivalent for audit purposes.				0.025043	0.025167
CMCSA	2024-10-23		PRICING_METHOD	CLOSE_REVERSAL	No identified Comcast corporate action or material news; offsetting close-reversal pricing difference. Review of Comcast investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 10/23/2024. The input row math is the				0.00012	0.0

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					offsetting leg of the 10/22/2024 close reversal: source1_return is 0.000120, source2_return is 0.000000, and diff_return is +0.000120 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The difference is immaterial and reverses, so source1 and source2 are economically equivalent for audit purposes.					
CMCSA	2024-12-09		NEWS	HIGH_SCORE_ANOMALY	Comcast broadband subscriber-loss warning and related stock decline. CNBC reported that Comcast shares tumbled on 12/09/2024 after Comcast Cable CEO Dave Watson said the company expected to lose more than 100,000 broadband subscribers in Q4, and Reuters/Investing independently reported the same broadband-loss warning and competitive pressure. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.095017, source2_return is -0.095017, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -9.5017% move is therefore a real broadband/news reaction reflected equally by source1 and source2, not a source1 remediation issue.				-0.095017	-0.095017
CMCSA	2025-01-30		NEWS	HIGH_SCORE_ANOMALY	Comcast Q4 2024 earnings and broadband subscriber-loss reaction. Comcast's Q4 2024 earnings release was furnished on 01/30/2025, and Reuters/Investing reported the same day that Comcast shares fell about 11% after steep broadband subscriber losses despite strong studio performance. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.110011, source2_return is -0.110011, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -11.0011% move is therefore a real earnings/broadband news move reflected equally by source1 and source2, not a source1 remediation issue.				-0.110011	-0.110011
CMCSA	2025-10-31		PRICING_METHOD	CLOSE_REVERSAL	Minor post-earnings close-reversal pricing difference with no same-day corporate action. Comcast reported Q3 2025 results on 10/30/2025, but review of Comcast releases and historical-price sources did not identify a same-day 10/31/2025 split, cash distribution, spin-off, merger, rights offering, or source-specific event adjustment. The input row math shows only a small close-reversal difference: source1_return is 0.018851, source2_return is 0.019034, and diff_return is -0.000183, while the next reviewed row reverses with a				0.018851	0.019034

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The difference is immaterial and reverses, so source1 and source2 are economically equivalent for audit purposes.					
CMCSA	2025-11-03		PRICING_METHOD	CLOSE_REVERSAL	Minor post-earnings close-reversal pricing difference with no same-day corporate action. Comcast's Q3 2025 earnings release occurred on 10/30/2025, and review of Comcast releases and historical-price sources did not identify a same-day 11/03/2025 split, cash distribution, spin-off, merger, rights offering, or source-specific event adjustment. The input row math is the offsetting leg of the 10/31/2025 close reversal: source1_return is -0.030717, source2_return is -0.030891, and diff_return is +0.000174 after the prior reviewed row had a negative diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The difference is immaterial and reverses, so source1 and source2 are economically equivalent for audit purposes.				-0.030717	-0.030891
CMCSA	2026-04-24		NEWS	HIGH_SCORE_ANOMALY	Comcast Q1 2026 earnings reaction and margin/broadband concerns. Comcast reported Q1 2026 results on 04/23/2026, including lower net income, adjusted EBITDA, and adjusted EPS, and TIKR reported that CMCSA fell about 12.9% on 04/24/2026 after the Q1 report despite headline beats, reflecting investor concern about margins and broadband. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for 04/24/2026. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.128951, source2_return is -0.128951, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -12.8951% move is therefore a real earnings/news reaction reflected equally by source1 and source2, not a source1 remediation issue.				-0.128951	-0.128951
ETN	2024-02-01		NEWS	HIGH_SCORE_ANOMALY	Eaton Q4 2023 earnings and 2024 guidance reaction. Eaton reported record Q4 2023 results and 2024 guidance on 02/01/2024, including record adjusted EPS, strong backlog, and organic-growth guidance; the SEC exhibit independently contains the same earnings release. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for this date. The input row math shows source1 and source2 are economically equivalent: source1_return is 0.075138, source2_return is 0.075138, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately +7.5138% move is therefore a real earnings/news				0.075138	0.075138

ticker	date	source1 fix priority	event bucket	analysis reason code	real world evidence	source1 problem and fix	source1 div split	source2 div split	source1 return	source2 return
					reaction reflected equally by source1 and source2, not a source1 remediation issue.					
ETN	2025-01-27		NEWS	HIGH_SCORE_ANOMALY	DeepSeek-related selloff in AI power and infrastructure names including Eaton. CNBC reported that AI-power and data-center exposed stocks plunged on 01/27/2025 after DeepSeek raised questions about future AI energy demand, and Investing.com specifically listed Eaton among energy/infrastructure stocks hit by DeepSeek-related concerns. No split, spin-off, merger, rights offering, or same-day cash distribution was identified for ETN on this date. The input row math shows source1 and source2 are economically equivalent: source1_return is -0.155645, source2_return is -0.155645, and diff_return is blank. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. The approximately -15.5645% move is therefore a real market/news reaction reflected equally by source1 and source2, not a source1 remediation issue.				-0.155645	-0.155645
EXC	2023-05-30		PRICING_METHOD	CLOSE_REVERSAL	No identified Exelon corporate action or material news; close-reversal pricing difference. Review of Exelon investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 05/30/2023. The input row math shows a close-reversal pricing difference: source1_return is 0.000635, source2_return is -0.001269, and diff_return is +0.001904, while the next reviewed row reverses with a negative diff_return of similar magnitude. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0. Because no event-return marker exists and the discrepancy reverses, source1 and source2 are economically equivalent for audit purposes.				0.000635	-0.001269
EXC	2023-05-31		PRICING_METHOD	CLOSE_REVERSAL	No identified Exelon corporate action or material news; offsetting close-reversal pricing difference. Review of Exelon investor news and historical-price sources did not identify a same-day split, cash distribution, spin-off, merger, rights offering, or material company news for 05/31/2023. The input row math is the offsetting leg of the 05/30/2023 close reversal: source1_return is 0.005962, source2_return is 0.007880, and diff_return is -0.001918 after the prior reviewed row had a positive diff_return. source1_div_split and source2_div_split are blank, has_div_split_mismatch is false, and both explicit dividend/split factors are 1.0.
