

Actionable Audit Report Summary

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
BDX	2022-04-01	HIGH	SPINOFF	MS_MISSING_EVENT	BD completed the Embecta diabetes-care business spin-off on 2022-04-01, distributing one Embecta share for every five BD shares. BD announced that the Embecta spin-off was expected to be completed on 2022-04-01, with each BD shareholder receiving one Embecta share for every five BD shares held as of the 2022-03-22 record date. BD SEC reporting subsequently states the Embecta spin-off was completed on 2022-04-01 and used the same one-for-five distribution ratio. Searches found no ordinary dividend, split, merger, rights offering, or separate news catalyst that better explains the row. Input row math supports yFinance: ms_return -0.013158 versus yf_return 0.011513, so diff_return -0.024671 means Massive is lower by about the spin-off impact. Massive has no event marker and ms_div_split_factor_explicit - 1 = 0.0, while yFinance has yf_div_split sp:1.025 and yf_div_split_factor_explicit - 1 = 0.025000, matching expected_return_impact 0.025000. Massive omits the distributed Embecta value; yFinance captures the real-world spin-off adjustment.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.025	-0.013158	0.011513
BDX	2026-02-10	HIGH	SPINOFF	MS_MISSING_EVENT	BD completed the Biosciences and Diagnostic Solutions spin-off/Reverse Morris Trust combination with Waters, with BDX trading ex-distribution on 2026-02-10. BD announced completion on 2026-02-09 of the spin-off of its Biosciences and Diagnostic Solutions business and combination with Waters. The 8-K/press release states BD shareholders would receive about 0.135 Waters shares for each BD share held as of the 2026-02-05 record date, and OCC identified the anticipated 2026-02-10 ex-date for the distribution. This is a spin-off/Reverse Morris Trust transaction, not an ordinary dividend, split, merger consideration payable in BD shares, or rights offering. Input row math supports yFinance: ms_return -0.172188 versus yf_return 0.052977, so diff_return -0.225165 means Massive is lower after yFinance recognizes distribution value. Massive has no event marker and ms_div_split_factor_explicit - 1 = 0.0, while yFinance has yf_div_split sp:1.272 and yf_div_split_factor_explicit - 1 = 0.272000, consistent with expected_return_impact 0.272000 under the audit event-return convention. The marker magnitude and signed return gap point to a missing Massive event adjustment; yFinance better reconciles to the confirmed transaction.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.272	-0.172188	0.052977
BWA	2023-07-05	HIGH	SPINOFF	MS_MISSING_EVENT	BorgWarner completed the PHINIA spin-off; BWA traded ex-distribution on 2023-07-05 with PHINIA shares distributed to BWA holders.	Massive is missing the event/adjustment needed to explain the return difference.		sp:1.136	-0.135016	-0.017378

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					BorgWarner announced completion of the PHINIA spin-off on 2023-07-03, with PHINIA beginning regular NYSE trading on 2023-07-05. An independent distribution notice identifies a 0.2 PHIN share distribution per BWA share and NYSE ex-distribution date of 2023-07-05. No ordinary dividend, rights offering, merger consideration, or same-day earnings catalyst better explains the row. Input row math supports yFinance: ms_return -0.135016 versus yf_return -0.017378, diff_return -0.117638, Massive has no event marker and ms_return_div_split_explicit impact is 0.0, while yFinance has yf_div_split sp:1.136 and yf_return_div_split_explicit impact 0.136000. yFinance captures the economic value of the PHINIA distribution and Massive misses it.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
CF	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	CF Industries \$0.50 regular quarterly cash dividend with 2024-05-14 ex-dividend date, 2024-05-15 record date, and 2024-05-31 payment.	Massive is missing the event/adjustment needed to explain the return difference.		ca:0.5	0.001616	0.008405
					Dividend history sources confirm CF Industries had a \$0.50 quarterly dividend with 2024-05-14 ex-dividend date, 2024-05-15 record date, and 2024-05-31 payment. A second independent dividend source lists the same \$0.50 dividend, declared 2024-04-18, with 2024-05-31 payment. No split, spin-off, merger, rights offering, or separate material news catalyst was identified for the date. Input row math supports yFinance: ms_return 0.001616 versus yf_return 0.008405, diff_return -0.006789, Massive has no event marker and ms_return_div_split_explicit impact is 0.0, while yFinance has yf_div_split ca:0.5 with yf_return_div_split_explicit impact 0.006733 and implied impact 0.006779. yFinance captures the confirmed cash distribution and Massive omits it.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
CMCSA	2026-01-05	HIGH	SPINOFF	MS_MISSING_EVENT	Comcast completed the Versant Media Group spin-off, distributing one Versant share per 25 Comcast shares with ex-distribution trading on 2026-01-05.	Massive is missing the event/adjustment needed to explain the return difference.		sp:1.067	-0.047732	0.01607
					Comcast announced completion of the Versant separation effective 2026-01-02, with Versant regular-way trading beginning 2026-01-05. Comcast shareholders received one Versant share for every 25 Comcast shares held on the 2025-12-16 record date, and Comcast cost-basis guidance gives first trading-day prices and a separate Versant basis allocation. No ordinary split, cash dividend, merger, or rights offering better explains the row. Input row math supports yFinance: ms_return -0.047732 versus yf_return 0.016070, diff_return -0.063802, Massive has no event marker and ms_return_div_split_explicit impact is 0.0, while yFinance has yf_div_split sp:1.067 and yf_return_div_split_explicit impact 0.067000. yFinance captures the Versant distribution value and Massive misses it.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
DHR	2023-10-02	HIGH	SPINOFF	MS_MISSING_EVENT	Danaher completed the Veralto spin-off, distributing one Veralto share for every three Danaher shares.	Massive is missing the event/adjustment needed to explain		sp:1.128	-0.138493	-0.02822

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Danaher completed the Veralto separation; shareholders received one Veralto share for every three Danaher shares held as of the 2023-09-13 record date, and regular-way Veralto trading began 2023-10-02. Veralto SEC filings independently confirm the same distribution ratio and record-date treatment. No cash dividend, ordinary split, merger, or rights event better explains the row. Input row math supports yFinance: ms_return -0.138493 versus yf_return -0.028220, diff_return -0.110273, Massive has no event marker and ms_return_div_split_explicit impact is 0.0, while yFinance has yf_div_split sp:1.128 and yf_return_div_split_explicit impact 0.128000. yFinance captures the Veralto distribution value and Massive misses it.	the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
ED	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	Con Edison \$0.83 regular quarterly cash dividend with 2024-05-14 ex-date and 2024-06-14 payment.	Massive is missing the event/adjustment needed to explain the return difference.		ca:0.83	-0.010242	-0.001756
					Con Edison dividend history confirms a \$0.83 quarterly cash dividend declared 2024-04-18, ex-date 2024-05-14, record date 2024-05-15, and payable 2024-06-14; StockAnalysis independently lists the same amount and dates. No split, spin-off, merger, rights offering, or separate material news catalyst was identified. Input row math supports yFinance: ms_return -0.010242 versus yf_return -0.001756, diff_return -0.008486, Massive has no event marker and ms_return_div_split_explicit impact is 0.0, while yFinance has yf_div_split ca:0.83 with yf_return_div_split_explicit impact 0.008501 and implied impact 0.008573. yFinance captures the cash distribution and Massive omits it.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
EXC	2022-02-02	HIGH	SPINOFF	MS_MISSING_EVENT	Exelon completed the Constellation Energy spin-off, distributing 1 CEG share for every 3 EXC shares.	Massive is missing the event/adjustment needed to explain the return difference.		sp:1.402	-0.258862	0.039075
					Exelon announced completion of the Constellation separation on 2022-02-02. Exelon and Constellation both state that EXC shareholders received one CEG share for every three EXC shares held on the 2022-01-20 record date, with CEG regular-way trading beginning 2022-02-02. Input row math shows yFinance carrying a split/spin adjustment while Massive has no event, producing a -25.8862% Massive raw price return versus a +3.9075% yFinance adjusted return. Massive is missing the spin-off adjustment; yFinance is more likely correct.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
FCX	2022-10-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2022-10-13, composed of base and variable components.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	0.020685	0.023353
					External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2022-10-13 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains				

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					dividend plus a \$0.075 variable/performance-based cash dividend when both components are declared. The input row math for 2022-10-13 shows yFinance recording ca:0.15 while Massive records only cd:0.075, and the Massive/yFinance adjusted-return gap is approximately the missing second \$0.075 component. Massive is therefore incomplete, while yFinance reflects the full distribution amount.	the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2023-01-12	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2023-01-12, composed of base and variable components. External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2023-01-12 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base dividend plus a \$0.075 variable/performance-based cash dividend when both components are declared. The input row math for 2023-01-12 shows yFinance recording ca:0.15 while Massive records only cd:0.075, and the Massive/yFinance adjusted-return gap is approximately the missing second \$0.075 component. Massive is therefore incomplete, while yFinance reflects the full distribution amount.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.003205	-0.00155
FCX	2023-04-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2023-04-13, composed of base and variable components. External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2023-04-13 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base dividend plus a \$0.075 variable/performance-based cash dividend when both components are declared. The input row math for 2023-04-13 shows yFinance recording ca:0.15 while Massive records only cd:0.075, and the Massive/yFinance adjusted-return gap is approximately the missing second \$0.075 component. Massive is therefore incomplete, while yFinance reflects the full distribution amount.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	0.046412	0.048328
FCX	2023-07-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2023-07-13, composed of base and variable components. External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2023-07-13 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base dividend plus a \$0.075 variable/performance-based cash dividend when both components are declared. The input row math for 2023-07-13 shows yFinance recording ca:0.15 while Massive records only cd:0.075, and the Massive/yFinance adjusted-return gap is approximately the missing second \$0.075 component. Massive is therefore incomplete, while yFinance reflects the full distribution amount.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	0.035306	0.03722

FCX	2026-01-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2026-01-15, composed of base and variable components.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	-0.005226	-0.003987
					External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2026-01-15 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base dividend plus a \$0.075 variable/performance-based cash dividend when both components are declared. The input row math for 2026-01-15 shows yFinance recording ca:0.15 while Massive records only cd:0.075, and the Massive/yFinance adjusted-return gap is approximately the missing second \$0.075 component. Massive is therefore incomplete, while yFinance reflects the full distribution amount.	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2026-04-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend on 2026-04-15, composed of base and variable components.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	0.007405	0.008514
					External dividend-history sources show Freeport-McMoRan paid a \$0.15 quarterly dividend on the 2026-04-15 ex-dividend date. FCX disclosures describe the payout framework as a \$0.075 base	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains

						dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
O	2021-11-15	HIGH	SPINOFF	MS_MISSING_EVENT	Realty Income completed the Orion Office REIT spin-off, distributing 1 ONL share for every 10 O shares. Realty Income completed the Orion Office REIT spin-off on 2021-11-15; shareholders received one ONL share for every ten Realty Income shares held. OCC materials also show a 0.10 ONL distribution ratio for each O share. The input row math shows yFinance carrying sp:1.032 while Massive has no event, so Massive is missing the spin-off adjustment and yFinance is more likely correct.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.032	-0.021996	0.0093
T	2022-04-11	HIGH	SPINOFF	MS_MISSING_EVENT	AT&T completed the WarnerMedia spin-off/merger into Warner Bros. Discovery, with T holders receiving 0.241917 WBD shares per T share. The input row shows yFinance carrying a split-like adjustment sp:1.324 while Massive has no event; Massive shows a -18.7% price return whereas yFinance shows a +7.7% adjusted return. External research confirms AT&T completed the WarnerMedia separation and merger with Discovery, and AT&T holders received 0.241917 WBD shares for each AT&T share while keeping their AT&T shares. This Reverse Morris Trust/spin-off required an adjustment to T history; yFinance reflects the event and Massive appears to miss the adjustment.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.324	-0.186827	0.076641
TEL	2024-11-22	HIGH	DISTRIBUTION	MS_EXTRA_EVENT	TE Connectivity had one \$0.65 quarterly cash dividend associated with the November 22, 2024 dividend date. The input row shows Massive recording cd:0.65 twice while yFinance records one ca:0.65, and the extra Massive event explains the roughly 44 bp return difference. External research confirms TE Connectivity planned a single \$0.65 quarterly installment payable December 6, 2024 to holders of record on November 22, 2024, and dividend-history sources list one \$0.65 dividend for November 22, 2024. yFinance matches the single supported distribution; Massive appears to have duplicated the event.	Massive records an extra corporate-action event or excessive event amount. Massive appears incorrect because it captured an extra same-day corporate-action event or event amount, and the excess event-return piece explains the Massive/yFinance return difference. Remove the unsupported Massive event amount or duplicate event, then rebuild the adjusted close and adjusted return chain.	cd:0.65 cd:0.65	ca:0.65	0.020373	0.015947
ULTA	2023-05-30	HIGH	PRICING_METH OD	CLOSE_REVERSAL	No material company event found; May 30 reflects a vendor close discrepancy, with external pricing supporting the yFinance close near \$412.20. The input row shows a close discrepancy: Massive close 406.73 versus yFinance close 412.200012, with no split or distribution. External price evidence	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across			-0.032217	-0.019202

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					identifies ULTA at \$412.20 for the May 30, 2023 start price, matching yFinance rather than Massive. I found no same-day corporate action or material company event; the issue is a close/pricing-method discrepancy, and the following row reverses the return-chain impact.	adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.				
ULTA	2023-05-31	HIGH	PRICING_METH OD	CLOSE_REVERSAL	No material company event found; May 31 return difference follows from the prior-day ULTA close discrepancy. Both vendors agree on the May 31 close near \$409.83, but returns differ because Massive uses its lower May 30 close while yFinance uses the externally supported \$412.20 May 30 close. No split, distribution, or material company news explains the difference. This is the reversal/continuation of the prior-day close discrepancy, with yFinance more likely correct for the return chain.	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.			0.007622	-0.00575
ZBH	2022-03-01	HIGH	SPINOFF	MS_MISSING_EVENT	Zimmer Biomet completed the ZimVie spin-off, distributing one ZimVie share for every ten Zimmer Biomet shares. The input row shows yFinance carrying a spin-off adjustment while Massive has no event, causing a 2.93 percentage point return difference. External research confirms Zimmer Biomet completed the ZimVie spin-off on March 1, 2022, distributing 80.3% of ZimVie to ZBH holders, with holders receiving one ZimVie share for every ten Zimmer Biomet shares held on the February 15, 2022 record date. yFinance reflects the required spin-off adjustment; Massive appears to miss it.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.03	-0.02398	0.005301
