

Actionable Audit Report Summary

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
BDX	2022-04-01	HIGH	SPINOFF	MS_MISSING_EVENT	BD completed the Embecta spin-off on April 1, 2022, distributing Embecta shares to BD shareholders. BD's SEC filing states that on 04/01/2022 the company completed the spin-off of its Diabetes Care business as Embecta and distributed one Embecta share for every five BD shares held as of the 03/22/2022 record date. Nasdaq's corporate-action alert independently confirms the Embecta spin-off, the 03/22/2022 record date, and 04/01/2022 payment/distribution date. The input row math supports yFinance: yFinance has sp:1.025 while Massive has no event marker, yf_div_split_factor_explicit is 1.025, and diff_return is -0.024671, meaning Massive's adjusted return is lower by about the missing +2.5% event impact. Massive appears to be missing the spin-off adjustment, so yFinance is more economically correct.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.025	-0.013158	0.011513
BDX	2026-02-10	HIGH	SPINOFF	MS_MISSING_EVENT	BD Biosciences & Diagnostic Solutions spin-off and combination with Waters, effective for trading adjustment on February 10, 2026. BD announced the record date for the spin-off of its Biosciences & Diagnostic Solutions business and disclosed that the transaction would close on 02/09/2026, with BD common stock expected to trade ex-distribution on the first trading day after closing. MIAX independently issued a corporate-action alert stating BDX had announced a spin-off effective Tuesday 02/10/2026. The input row math supports yFinance: yFinance has sp:1.272 while Massive has no event marker, yf_div_split_factor_explicit is 1.272, and diff_return is -0.225165, meaning Massive's adjusted return is materially lower because it lacks the event factor. Massive appears to be missing the spin-off/Reverse Morris Trust distribution adjustment, so yFinance is more economically correct.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.272	-0.172188	0.052977
BWA	2023-07-05	HIGH	SPINOFF	MS_MISSING_EVENT	BorgWarner completed the PHINIA spin-off, with PHINIA beginning independent NYSE trading after the July 2023 separation. BorgWarner announced completion of the PHINIA spin-off on 2023-07-03, and PHINIA's SEC filing states each BorgWarner holder received one PHINIA share for every five BorgWarner shares held on the 2023-06-23 record date. The row's yFinance event marker is sp:1.136 and yf_div_split_factor_explicit is 1.136, while Massive has no event marker and factor 1.0. The return gap of -0.117638 is economically consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.136 - 1.0 = 0.136. yFinance better reconciles to the confirmed spin-off.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.136	-0.135016	-0.017378

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
CF	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	CF Industries \$0.50 quarterly dividend with May 14, 2024 ex-dividend date. CF Industries had a \$0.50 quarterly dividend with a 2024-05-14 ex-dividend date, 2024-05-15 record date, and 2024-05-31 payment date. StockAnalysis and CoinCodex independently report the same amount and ex-dividend timing. The row's yFinance factor is 1.006733 while Massive remains 1.0, and diff_return is -0.006789. The expected cash-dividend impact is approximately \$0.50 divided by the prior price, matching the row's yFinance distribution adjustment. yFinance reconciles to the confirmed dividend while Massive appears to omit the event adjustment.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		ca:0.5	0.001616	0.008405
CMCSA	2026-01-05	HIGH	SPINOFF	MS_MISSING_EVENT	Comcast completed the Versant Media Group spin-off, with the distribution reflected in trading on January 5, 2026. Comcast announced completion of the Versant Media Group separation effective 11:59 p.m. on 2026-01-02, with shareholders receiving one Versant share for every 25 Comcast shares held as of the 2025-12-16 record date. Investing.com independently confirmed the separation and distribution ratio. The row's yFinance event marker is sp:1.067 and yf_div_split_factor_explicit is 1.067, while Massive has no event marker and factor 1.0. The return gap of -0.063802 is consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.067 - 1.0 = 0.067. yFinance reconciles to the confirmed spin-off.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.067	-0.047732	0.01607
DHR	2023-10-02	HIGH	SPINOFF	MS_MISSING_EVENT	Danaher completed the Veralto spin-off, with Veralto regular-way trading beginning October 2, 2023. Danaher announced completion of the Veralto separation, with Veralto beginning regular-way NYSE trading on 2023-10-02. Danaher's release states shareholders received one Veralto share for every three Danaher shares held, and the OCC memo independently confirms the distribution with an October 2, 2023 date. The row's yFinance event marker is sp:1.128 and yf_div_split_factor_explicit is 1.128, while Massive has no event marker and factor 1.0. The return gap of -0.110273 is consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.128 - 1.0 = 0.128. yFinance reconciles to the confirmed spin-off.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.128	-0.138493	-0.02822
ED	2024-05-14	HIGH	DISTRIBUTION	MS_MISSING_EVENT	Consolidated Edison \$0.83 quarterly dividend with May 14, 2024 ex-dividend date. Consolidated Edison had a \$0.83 quarterly dividend with a 2024-05-14 ex-dividend date, 2024-05-15 record date, and 2024-06-14 payment date. StockAnalysis and CoinCodex independently report the same dividend amount and timing. The row's	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did		ca:0.83	-0.010242	-0.001756

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					yFinance factor is 1.008501 while Massive remains 1.0, and diff_return is -0.008486. The expected cash-dividend impact is approximately \$0.83 divided by the prior price, matching the row's yFinance distribution adjustment. yFinance reconciles to the confirmed dividend while Massive appears to omit the event adjustment.	not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
EXC	2022-02-02	HIGH	SPINOFF	MS_MISSING_EVENT	Exelon completed the Constellation Energy spin-off, effective for trading on February 2, 2022. Nasdaq's corporate-action alert states Exelon announced a spin-off of Constellation Energy with an ex-date of 2022-02-02, and Constellation's investor FAQ confirms Exelon shareholders received one Constellation share for every three Exelon shares held as of the record date. The row's yFinance event marker is sp:1.402 and yf_div_split_factor_explicit is 1.402, while Massive has no event marker and factor 1.0. The return gap of -0.297937 is consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.402 - 1.0 = 0.402. yFinance reconciles to the confirmed spin-off.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.402	-0.258862	0.039075
FCX	2022-10-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's dividend program includes a base dividend plus a variable performance-based component, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends in this period. The row shows Massive applying only a 1.002601 factor while yFinance applies 1.005201, roughly double Massive's adjustment. That is consistent with Massive capturing only the partial/base component and yFinance capturing the full cash distribution. yFinance better reconciles to the full dividend economics.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	0.020685	0.023353
FCX	2023-01-12	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend, including base and variable components, for the January 2023 dividend cycle. Freeport-McMoRan's annual report states the December 2022 board declaration totaled \$0.15 per share, including a \$0.075 base dividend and a \$0.075 variable performance-based dividend, paid to shareholders of record in January 2023. StockAnalysis independently lists the FCX dividend history. The row shows Massive applying only a 1.001655 factor while yFinance applies 1.00331, exactly double the Massive component. yFinance better reconciles to the full cash distribution.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.003205	-0.00155
FCX	2023-04-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full	Massive records a corporate-action event, but the event amount appears	cd:0.075	ca:0.15	0.046412	0.048328

					distribution. Freeport-McMoRan's dividend framework uses both a base and variable performance-based component, and the company later described a \$0.15 quarterly dividend as \$0.075 base plus \$0.075 variable. StockAnalysis lists FCX's recurring \$0.15 quarterly dividends. The row shows Massive applying a 1.001824 factor while yFinance applies 1.003648, exactly double Massive's adjustment. yFinance better reflects the full cash dividend; Massive appears to capture only half of the event.	incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2023-07-13	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	0.035306	0.03722
					Freeport-McMoRan's declared quarterly dividend structure includes a base component and a variable performance-based component, totaling \$0.15 in the comparable 2023 declarations. StockAnalysis lists FCX's quarterly dividend history. The row shows Massive applying a 1.001842 factor while yFinance applies 1.003684, exactly double Massive's adjustment. yFinance better reconciles to the full dividend economics while Massive appears partial.	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2023-10-12	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend declared in September 2023, split between base and variable components.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	-0.027107	-0.025135
					Freeport-McMoRan declared \$0.15 per share in cash dividends payable November 1, 2023 to shareholders of record October 13, 2023, including \$0.075 base and \$0.075 variable components. StockAnalysis independently lists FCX's dividend history. The row shows Massive applying a 1.002019 factor while yFinance applies 1.004038, exactly double Massive's adjustment. yFinance captures the full \$0.15 distribution, while Massive appears to capture only the base or variable half.	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2024-01-11	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan \$0.15 quarterly cash dividend for the January 2024 dividend cycle.	Massive records a corporate-action event, but the event amount appears incomplete.	cd:0.075	ca:0.15	-0.00473	-0.002916
					Freeport-McMoRan's 2023 Form 10-K states the combined annual rate of base and variable dividends totaled \$0.60 per share and describes quarterly cash dividends totaling \$0.15 per share, including \$0.075 base and \$0.075 variable components. StockAnalysis lists the FCX quarterly dividend history. The row shows Massive applying a 1.001816 factor while	Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference.				

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					yFinance applies 1.003632, exactly double Massive's adjustment. yFinance better reconciles to the full distribution.	Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2024-04-12	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's filings describe a quarterly \$0.15 dividend composed of \$0.075 base and \$0.075 variable components, and StockAnalysis lists the recurring FCX dividend history. The row shows Massive applying a 1.001478 factor while yFinance applies 1.002956, exactly double Massive's adjustment. yFinance better captures the full cash distribution, while Massive appears to use only half the dividend amount.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.023586	-0.022139
FCX	2024-07-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's filings describe a quarterly \$0.15 dividend composed of \$0.075 base and \$0.075 variable components, and StockAnalysis lists the recurring FCX dividend history. The row shows Massive applying a 1.001463 factor while yFinance applies 1.002925, essentially double Massive's adjustment. yFinance better reconciles to the full cash distribution.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.015331	-0.013886
FCX	2024-10-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's filings describe a quarterly \$0.15 dividend composed of \$0.075 base and \$0.075 variable components, and StockAnalysis lists FCX's dividend history. The row shows Massive applying a 1.001535 factor while yFinance applies 1.00307, exactly double Massive's adjustment. yFinance better captures the full distribution; Massive appears partial.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.03085	-0.029357
FCX	2025-01-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full	Massive records a corporate-action event, but the event amount appears	cd:0.075	ca:0.15	0.015346	0.017281

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					distribution. Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends. The row shows Massive applying a 1.001899 factor while yFinance applies 1.003797, approximately double Massive's adjustment. yFinance better reconciles to the full cash distribution while Massive appears to capture only one half of the dividend.	incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2025-04-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends. The row shows Massive applying a 1.002222 factor while yFinance applies 1.004444, exactly double Massive's adjustment. The expected impact matches the full dividend divided by prior price, so yFinance better reconciles to the real-world cash distribution.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.009057	-0.006845
FCX	2025-07-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends. The row shows Massive applying a 1.001644 factor while yFinance applies 1.003287, approximately double Massive's adjustment. yFinance better reflects the full distribution; Massive appears to capture only a partial component.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.0315	-0.029903

Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends. The row shows Massive applying a 1.001787 factor while yFinance applies 1.003574, exactly double Massive's adjustment. yFinance better	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference.	cd:0.075	ca:0.15	-0.004416	-0.002631

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					reconciles to the full cash distribution; Massive appears to capture only half of the dividend.	Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.				
FCX	2026-01-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends, including the 2026 cycle. The row shows Massive applying a 1.001243 factor while yFinance applies 1.002486, exactly double Massive's adjustment. yFinance better reconciles to the full cash distribution; Massive appears partial.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	-0.005226	-0.003987
FCX	2026-04-15	HIGH	DISTRIBUTION	MS_PARTIAL_EVENT	Freeport-McMoRan quarterly cash dividend with base and variable components; yFinance reflects the full distribution. Freeport-McMoRan's dividend framework includes equal base and variable components, and StockAnalysis lists FCX's recurring \$0.15 quarterly dividends, including the April 2026 ex-dividend date. The row shows Massive applying a 1.001099 factor while yFinance applies 1.002197, approximately double Massive's adjustment. yFinance better reflects the full cash distribution; Massive appears to capture only half of the dividend.	Massive records a corporate-action event, but the event amount appears incomplete. Massive appears incorrect because it captured only part of the same-day corporate-action event, and the missing event-return piece explains the Massive/yFinance return difference. Correct the Massive event amount to include the full corporate-action distribution, then rebuild the adjusted close and adjusted return chain.	cd:0.075	ca:0.15	0.007405	0.008514
GM	2024-02-29	HIGH	DISTRIBUTION	MS_MISSING_EVENT	General Motors \$0.12 quarterly dividend with February 29, 2024 ex-dividend date. General Motors declared a first-quarter 2024 cash dividend of \$0.12 per share payable 2024-03-14 to shareholders of record as of 2024-03-01. StockAnalysis independently lists the 2024-02-29 ex-dividend date, \$0.12 amount, 2024-03-01 record date, and 2024-03-14 payment date. The row's yFinance factor is 1.002953 while Massive remains 1.0, and diff_return is -0.002988. The expected cash-dividend impact is approximately \$0.12 divided by the prior price, matching yFinance's event adjustment. yFinance reconciles to the confirmed dividend while Massive appears to omit it.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		ca:0.12	0.008614	0.011602
ILMN	2024-06-25	HIGH	SPINOFF	MS_MISSING_EVENT	Illumina completed the GRAIL spin-off, with GRAIL regular-way trading beginning June 25, 2024.	Massive is missing the event/adjustment needed to explain the return difference.		sp:1.028	-0.003628	0.02427

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Illumina's board approved the GRAIL spin-off and declared a pro rata distribution in which Illumina shareholders received one GRAIL share for every six Illumina shares held as of the record date; GRAIL regular-way trading began on Nasdaq on 2024-06-25. The OCC memo independently confirms the GRAIL distribution and June 25, 2024 ex-date. The row's yFinance event marker is sp:1.028 and yf_div_split_factor_explicit is 1.028, while Massive has no event marker and factor 1.0. The return gap of -0.027898 is consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.028 - 1.0 = 0.028. yFinance reconciles to the confirmed spin-off.	Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
IP	2021-10-01	HIGH	SPINOFF	MS_MISSING_EVENT	International Paper completed the Sylvamo spin-off on October 1, 2021. International Paper completed the spin-off of Sylvamo on 2021-10-01. The SEC filing states shareholders received one Sylvamo share for every 11 International Paper shares held as of the September 15, 2021 record date, and the company release confirms the completion of the Sylvamo spin-off. The row's yFinance event marker is sp:1.056 and yf_div_split_factor_explicit is 1.056, while Massive has no event marker and factor 1.0. The return gap of -0.053336 is consistent with Massive missing the spin-off adjustment; expected_return_impact is 1.056 - 1.0 = 0.056. yFinance reconciles to the confirmed spin-off.	Massive is missing the event/adjustment needed to explain the return difference. Massive appears incorrect because the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.		sp:1.056	-0.047568	0.005768

					completed the WarnerMedia distribution and Discovery combination in April 2022, and the SEC-filed release says Warner Bros. Discovery began trading under WBD on 2022-04-11. The input row math shows yFinance applying a 1.324 explicit factor while Massive applies 1.0; the large return difference reconciles to Massive missing the spin-off adjustment. yFinance is more likely correct.	the comparison source and real-world event evidence support an event/adjustment that Massive did not capture. Add or correct the missing Massive dividend/split event, apply the appropriate adjustment factor, and rebuild the adjusted close and adjusted return chain.				
TEL	2024-11-22	HIGH	DISTRIBUTION	MS_EXTRA_EVENT	TE Connectivity \$0.65 quarterly cash dividend went ex-dividend on 2024-11-22. TE Connectivity dividend-history sources confirm a single \$0.65 cash dividend with 2024-11-22 ex-dividend date and 2024-12-06 payment date. The input row math shows yFinance applying a 1.004318 factor, which is consistent with one dividend, while Massive applies 1.008637, approximately double the yFinance adjustment. Massive appears to have an extra or duplicated event adjustment; yFinance is more likely correct.	Massive records an extra corporate-action event or excessive event amount. Massive appears incorrect because it captured an extra same-day corporate-action event or event amount, and the excess event-return piece explains the Massive/yFinance return difference. Remove the unsupported Massive event amount or duplicate event, then rebuild the adjusted close and adjusted return chain.	cd:0.65 cd:0.65	ca:0.65	0.020373	0.015947
ULTA	2023-05-30	HIGH	PRICING_METHOD	CLOSE_REVERSAL	No material Ulta Beauty event identified for May 30, 2023; discrepancy reverses the next day. No new same-day Ulta Beauty corporate action or material catalyst was identified for 2023-05-30; the major company-specific event was the prior trading day's earnings/guidance reaction. The input row has no vendor event marker, both explicit dividend/split factors are 1.0, and the -0.013015 return difference reverses almost exactly on 2023-05-31. Historical-price context aligns the two-day path more closely with yFinance, making Massive's 2023-05-30 close the likely stale or inconsistent value. yFinance is more likely correct.	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.			-0.032217	-0.019202
ULTA	2023-05-31	HIGH	PRICING_METHOD	CLOSE_REVERSAL	No material Ulta Beauty event identified for May 31, 2023; row completes the adjacent-day pricing reversal. No new same-day Ulta Beauty corporate action or material catalyst was identified for 2023-05-31, and both explicit vendor factors are 1.0. The row's 0.013371 diff_return offsets the prior day's -0.013015 difference, indicating an adjacent close/adjusted-close pricing reversal rather than a persistent economic disagreement. Because the input row evidence points to Massive's prior-day close as the inconsistent observation, yFinance is more likely correct for the two-day sequence.	Massive close appears incorrect after an adjacent-day close reversal. Massive appears incorrect because independent evidence supports the comparison source's close, and the return difference reverses across adjacent trading days. Review and correct the Massive close for the affected date, then rebuild the adjusted close and adjusted return chain.			0.007622	-0.00575
