

Non-Actionable Audit Report Summary

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
ALLE	2025-09-15		DISTRIBUTION	YF_MISSING_EVENT	Allegion \$0.51 quarterly cash dividend with 2025-09-15 record/ex-dividend treatment and 2025-09-30 payment. Allegion investor relations announced a \$0.51 quarterly dividend payable 2025-09-30 to shareholders of record on 2025-09-15, and Allegion dividend history independently lists declaration 2025-09-04, record 2025-09-15, payable 2025-09-30, amount \$0.51. Search also reviewed dividend-history/news sources and found no split, spin-off, merger, rights offering, or separate same-day material news catalyst. Input row math supports Massive: ms_return 0.009684 versus yf_return 0.006742, so diff_return 0.002942 means Massive is higher by approximately the dividend impact. Massive has ms_div_split cd:0.51 while yFinance has no marker; ms_div_split_factor_explicit - 1 = 0.002914 and ms_div_split_factor_implied - 1 = 0.002922 reconcile to expected_return_impact 0.002914, while yFinance explicit and implied factors are 1.0. Massive captures the confirmed cash distribution and yFinance omits it for this return date.		cd:0.51		0.009684	0.006742
ALLE	2025-12-16		DISTRIBUTION	YF_MISSING_EVENT	Allegion \$0.51 quarterly cash dividend with 2025-12-16 record/ex-dividend treatment and 2025-12-31 payment. Allegion investor relations announced a \$0.51 quarterly dividend payable 2025-12-31 to shareholders of record on 2025-12-16, and Allegion dividend history confirms declaration 2025-12-03, record 2025-12-16, payable 2025-12-31, amount \$0.51. Search also reviewed dividend-history/news sources and found no split, spin-off, merger, rights offering, or separate same-day material news catalyst. Input row math supports Massive: ms_return -0.017718 versus yf_return -0.020790, so diff_return 0.003072 means Massive is higher by approximately the dividend impact. Massive has ms_div_split cd:0.51 while yFinance has no marker; ms_div_split_factor_explicit - 1 = 0.003128 and ms_div_split_factor_implied - 1 = 0.003137 reconcile to expected_return_impact 0.003128, while yFinance explicit and implied factors are 1.0. Massive captures the confirmed cash distribution and yFinance omits it for this return date.		cd:0.51		-0.017718	-0.02079
ALLE	2026-02-17		NEWS	HIGH_SCORE_ANOMALY	Allegion Q4/FY2025 earnings release and 2026 outlook; stock decline followed earnings miss and residential-demand concerns. Allegion released Q4 and full-year 2025 results and 2026 outlook on 2026-02-17; the company release reported Q4 adjusted EPS of \$1.94 and 2026 adjusted EPS guidance of \$8.70 to \$8.90.				-0.09376	-0.09376

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Reuters/MarketScreener independently reported Allegion missed quarterly profit estimates as weak residential demand weighed on results. Corporate-action searches found the next dividend was declared 2026-02-04 for record date 2026-03-13 and payment 2026-03-31, not an event on 2026-02-17; no split, spin-off, merger, or rights offering was identified for this date. Input row math shows Massive and yFinance are economically identical: ms_return -0.093760 equals yf_return -0.093760, diff_return is blank, both event marker fields are blank, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The material move is a real earnings/news reaction, but Massive and yFinance both capture the same return, so no vendor-specific correction is indicated.					
AMCR	2024-05-01		NEWS	HIGH_SCORE_ANOMALY	Amcor fiscal Q3 2024 results and raised fiscal 2024 adjusted EPS guidance drove a material positive move. Amcor reported fiscal Q3 2024 results around 2024-04-30/2024-05-01, with the SEC-filed exhibit and PR Newswire release stating that volume and earnings trajectory improved and fiscal 2024 adjusted EPS guidance was raised. A separate corporate-action search found the next cash dividend had ex-date 2024-05-21/record date 2024-05-22, not 2024-05-01, and found no split, spin-off, merger, or rights offering for this row. Input row math shows Massive and yFinance are economically identical: ms_return 0.096197 equals yf_return 0.096197, diff_return is blank, Massive and yFinance have no event markers, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The large move is a real earnings/guidance news move, but both Massive and yFinance capture the same adjusted return, so BOTH are correct.				0.096197	0.096197
AMCR	2025-08-14		NEWS	HIGH_SCORE_ANOMALY	Amcor fiscal Q4/FY2025 results and outlook concerns drove a material selloff on 2025-08-14. Amcor furnished an 8-K on 2025-08-14 for fiscal Q4 and fiscal 2025 results. News/market sources reported AMCR sold off sharply after earnings and revenue shortfalls, weak outlook concerns, soft volumes, and Berry integration/sector headwinds. A separate corporate-action search found a dividend declared on 2025-08-14 for record/ex-dividend date 2025-09-05 and payment 2025-09-25, not an ex-date event on 2025-08-14; no split, spin-off, merger, or rights offering was identified for this row. Input row math shows Massive and yFinance are economically identical: ms_return -0.118712 equals yf_return -0.118712, diff_return is blank, both event marker fields are blank, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The				-0.118712	-0.118712

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					material negative move is explained by earnings/news, not a Massive versus yFinance return defect.					
AMCR	2025-09-05		DISTRIBUTION	YF_MISSING_EVENT	Amcor \$0.1275 quarterly cash dividend with 2025-09-05 record/ex-dividend treatment and 2025-09-25 payment. Amcor annual-report/SEC materials state that on 2025-08-14 the board declared a quarterly cash dividend of \$0.1275 per share payable 2025-09-25 to shareholders of record as of 2025-09-05. An independent dividend source lists declaration 2025-08-14, record 2025-09-05, payment 2025-09-25, amount \$0.1275; split-adjusted displays may show \$0.6375 after the later 1-for-5 reverse split, but the contemporaneous per-share dividend was \$0.1275. Searches found no same-day split, spin-off, merger, rights offering, or separate material news catalyst. Input row math supports Massive: ms_return 0.009425 versus yf_return -0.005988, so diff_return 0.015413 means Massive is higher by the dividend impact. Massive has ms_div_split cd:0.1275 while yFinance has no marker; ms_div_split_factor_explicit - 1 = 0.015269 and ms_div_split_factor_implied - 1 = 0.015506 reconcile to expected_return_impact 0.015269, while yFinance explicit and implied factors are 1.0. Massive captures the confirmed cash distribution and yFinance omits it.		cd:0.1275		0.009425	-0.005988
AMCR	2025-11-28		DISTRIBUTION	YF_MISSING_EVENT	Amcor \$0.13 quarterly cash dividend with NYSE ex/record date 2025-11-28 and 2025-12-17 payment. Amcor fiscal Q1 2026 materials state the board declared a quarterly dividend paid in U.S. dollars, with NYSE ex-dividend date 2025-11-28, record date 2025-11-28, and payment date 2025-12-17; independent dividend listings show declaration 2025-11-05, record 2025-11-28, payment 2025-12-17, amount \$0.13. Searches found no same-day split, spin-off, merger, rights offering, or separate material news catalyst. Input row math supports Massive: ms_return 0.003534 versus yf_return -0.011601, so diff_return 0.015134 means Massive is higher by the dividend impact. Massive has ms_div_split cd:0.13 while yFinance has no marker; ms_div_split_factor_explicit - 1 = 0.015081 and ms_div_split_factor_implied - 1 = 0.015312 reconcile to expected_return_impact 0.015081, while yFinance explicit and implied factors are 1.0. Massive captures the confirmed cash distribution and yFinance omits it.		cd:0.13		0.003534	-0.011601
BDX	2023-11-09		NEWS	HIGH_SCORE_ANOMALY	BD fiscal Q4 2023 earnings and below-consensus FY2024 EPS guidance drove a material negative stock move. BD released fiscal Q4 and full-year 2023 results on 2023-11-09. Benzinga reported BDX traded lower after adjusted EPS slightly missed consensus and FY2024 adjusted EPS guidance of \$12.70 to \$13.00				-0.092529	-0.092529

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					was below the \$13.51 consensus. A separate corporate-action search found a dividend was declared on 2023-11-09 but payable 2023-12-29 to holders of record 2023-12-08, not an ex-date event on 2023-11-09; no split, spin-off, merger, or rights offering was identified for the row. Input row math shows Massive and yFinance are economically identical: ms_return -0.092529 equals yf_return -0.092529, diff_return is blank, both event marker fields are blank, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The material move is earnings/guidance news, but BOTH vendors capture the same return.					
BDX	2025-05-01		NEWS	HIGH_SCORE_ANOMALY	BD fiscal Q2 2025 results, updated guidance, margin pressure, and tariff impact concerns drove a material selloff. BD released fiscal Q2 2025 results on 2025-05-01, updated full-year fiscal 2025 guidance, and provided an estimated tariff impact. Zacks reported BD stock fell despite an EPS beat as margins declined and fiscal 2025 adjusted EPS guidance was lowered. A separate corporate-action search found the next declared dividend was payable 2025-06-30 to holders of record 2025-06-09, not an ex-date event on 2025-05-01; no split, spin-off, merger, or rights offering was identified for this row. Input row math shows Massive and yFinance are economically identical: ms_return -0.181322 equals yf_return -0.181322, diff_return is blank, both event marker fields are blank, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The large negative move is earnings/guidance/tariff news, but not a Massive versus yFinance discrepancy.				-0.181322	-0.181322
BKR	2021-12-07		PRICING_METH OD	CLOSE_REVERSAL	Baker Hughes transferred its primary listing from NYSE to Nasdaq effective 2021-12-07; no economic corporate action was identified. Nasdaq announced Baker Hughes would begin listing and trading on Nasdaq on 2021-12-07 under the continued BKR ticker, and Baker Hughes SEC filing materials confirm the transfer from NYSE to Nasdaq with trading beginning on Nasdaq at market open on 2021-12-07. Searches for splits, dividends, spin-offs, mergers, rights offerings, earnings, and major company news found no shareholder-value corporate action on this date. Input row math shows no event markers for Massive or yFinance, has_div_split_mismatch is false, all explicit/implied dividend/split factors are 1.0, and ms_adj_factor equals yf_adj_factor. Massive ms_return 0.029075 versus yFinance yf_return 0.018837 creates diff_return 0.010238, but the next reviewed row reverses direction. The evidence supports a listing-transfer/close-source pricing-method artifact rather				0.029075	0.018837

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					than an economic event; BOTH are defensible and no Massive correction is indicated.					
BKR	2021-12-08		PRICING_METH OD	CLOSE_REVERSAL	No economic corporate action; return difference reversed after the BKR Nasdaq listing-transfer date. Nasdaq and Baker Hughes SEC materials confirm the nearby event was the 2021-12-07 transfer of BKR listing from NYSE to Nasdaq, a reference-data/listing venue event rather than a split, distribution, spin-off, merger, or rights offering. Searches found no same-day earnings release, dividend ex-date, split, or material company-specific news on 2021-12-08. Input row math shows no event markers for Massive or yFinance, has_div_split_mismatch is false, all explicit/implied dividend/split factors are 1.0, and ms_adj_factor equals yf_adj_factor. Massive ms_return -0.007163 versus yFinance yf_return 0.002814 creates diff_return -0.009976, essentially reversing the prior day positive discrepancy. The row is a benign close-source/listing-transfer reversal, so BOTH are defensible and no Massive correction is indicated.				-0.007163	0.002814
BKR	2024-10-14		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific event identified; small close-source difference before upcoming earnings coverage. Searches found upcoming Baker Hughes Q3 earnings coverage but no same-day BKR earnings release, guidance change, split, distribution, spin-off, merger, rights offering, or material company-specific news on 2024-10-14. Baker Hughes later declared a dividend on 2024-10-22 for record date 2024-11-04, so no dividend event belongs on this row. Input row math shows Massive ms_return -0.001724 versus yFinance yf_return -0.001591, an immaterial diff_return -0.000133, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The tiny discrepancy reverses on 2024-10-15 and is economically immaterial; BOTH are defensible.				-0.001724	-0.001591
BKR	2024-10-15		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific corporate event identified; small vendor close difference reversed. Searches found only upcoming earnings coverage; Baker Hughes Q3 results were released later, and SEC quarterly materials were for the period ended 2024-09-30. No split, dividend ex-date, spin-off, merger, rights offering, or material company-specific catalyst was identified on 2024-10-15. Input row math shows Massive ms_return -0.034941 versus yFinance yf_return -0.035069, an immaterial diff_return 0.000128, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The small difference offsets the prior day discrepancy and does not indicate a Massive or yFinance economic defect.				-0.034941	-0.035069

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
BKR	2024-11-06		NEWS	HIGH_SCORE_ANOMALY	BKR rallied with the post-2024 U.S. election market move and energy/industrial-sector strength. Market news reported a broad post-election rally on 2024-11-06 after Donald Trump won the U.S. presidential election, with stocks closing at record highs. Independent company/market coverage reported Baker Hughes reached a 52-week high amid an energy-sector/industry uptick and strong recent quarterly performance. Corporate-action searches found no split, cash distribution, spin-off, merger, or rights event for this date. Input row math shows Massive and yFinance agree economically: ms_return 0.107828 equals yf_return 0.107828, diff_return is blank, no event markers exist, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The high-score row reflects a real market/sector news move, but BOTH vendors capture the same return.				0.107828	0.107828
BKR	2024-11-08		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific event identified; small close-source difference after the post-election rally. Searches found BKR trading near highs after the post-election/industry rally but no same-day split, dividend ex-date, spin-off, merger, rights event, earnings release, or guidance change on 2024-11-08. Dividend-history review shows the nearby dividend ex-date was 2024-11-04, not 2024-11-08. Input row math shows Massive ms_return -0.001972 versus yFinance yf_return -0.001856, an immaterial diff_return -0.000116, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The tiny difference reverses on 2024-11-11 and is economically immaterial; BOTH are defensible.				-0.001972	-0.001856
BKR	2024-11-11		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific corporate event identified; small vendor close difference reversed. Searches found no BKR split, dividend ex-date, spin-off, merger, rights event, earnings release, or guidance change on 2024-11-11; the relevant nearby dividend ex-date was 2024-11-04. News context was the continuing post-election/energy-sector rally rather than a same-day corporate action. Input row math shows Massive ms_return 0.025456 versus yFinance yf_return 0.025337, an immaterial diff_return 0.000119, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The small difference offsets the prior reviewed close difference and does not support preferring Massive or yFinance.				0.025456	0.025337
BKR	2025-07-23		NEWS	HIGH_SCORE_ANOMALY	Baker Hughes Q2 2025 earnings and revenue beat estimates, with strong productivity and data-center order commentary. Baker Hughes furnished Q2 2025 results on 2025-07-				0.116442	0.116442

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					22 and held its earnings webcast on 2025-07-23. Zacks reported Q2 earnings and revenue beat estimates, with adjusted EPS of \$0.63 versus a \$0.55 consensus and revenue of \$6.91 billion; other coverage highlighted data-center-related orders and improved productivity. Corporate-action searches found only the ordinary dividend with ex-date 2025-08-05, not 2025-07-23, and no split, spin-off, merger, or rights event. Input row math shows Massive and yFinance are economically identical: ms_return 0.116442 equals yf_return 0.116442, diff_return is blank, no event markers exist, has_div_split_mismatch is false, and all explicit/implied dividend/split factors are 1.0. The high-score move is a real earnings/news reaction, but BOTH vendors capture the same return.					
BKR	2025-08-28		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific corporate event identified; small close-source difference. Dividend-history and price-history searches found no BKR dividend ex-date, split, spin-off, merger, rights event, earnings release, or material company-specific news on 2025-08-28. The nearby dividend ex-date was 2025-08-05 and payment date was 2025-08-15, both outside this row. Input row math shows Massive ms_return 0.017530 versus yFinance yf_return 0.017642, an immaterial diff_return -0.000112, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The small discrepancy reverses on 2025-08-29 and does not indicate a vendor-specific economic error.				0.01753	0.017642
BKR	2025-08-29		UNKNOWN	CLOSE_REVERSAL	No material BKR-specific corporate event identified; small vendor close difference reversed. Dividend-history and price-history searches found no BKR dividend ex-date, split, spin-off, merger, rights event, earnings release, or material company-specific news on 2025-08-29. The closest dividend event was the 2025-08-05 ex-date for the \$0.23 dividend, not this row. Input row math shows Massive ms_return -0.003621 versus yFinance yf_return -0.003730, an immaterial diff_return 0.000109, no event markers, has_div_split_mismatch false, matching adjustment factors, and all explicit/implied dividend/split factors at 1.0. The small discrepancy offsets the prior day close-source difference; BOTH are defensible.				-0.003621	-0.00373
BWA	2023-11-02		NEWS	HIGH_SCORE_ANOMALY	BorgWarner Q3 2023 earnings and guidance/revenue outlook concerns drove a material stock decline. BorgWarner reported third-quarter 2023 results on 2023-11-02, and contemporaneous market coverage reported BWA shares trading lower by about 11% after the earnings release. The company also trimmed parts of its 2023 outlook, including eProduct sales expectations. No split, cash distribution, spin-off, merger, or rights event was identified for this date.				-0.130693	-0.130693

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Input row math shows Massive and yFinance agree economically: ms_return -0.130693 equals yf_return -0.130693, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. The material decline is a real earnings/guidance news move, not a Massive versus yFinance reconciliation issue.					
BWA	2026-02-11		NEWS	HIGH_SCORE_ANOMALY	BorgWarner Q4/FY2025 results, 2026 guidance, and data-center turbine-generator award drove a major positive stock reaction. BorgWarner reported 2025 results and 2026 guidance on 2026-02-11 and announced entry into the data-center market with a turbine-generator system award. Independent wire/Nasdaq coverage confirms the same earnings, guidance, shareholder-return, and data-center award announcement. No split, cash distribution, spin-off, merger, or rights event was identified for this date. Input row math shows Massive and yFinance are economically identical: ms_return 0.224528 equals yf_return 0.224528, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. The large positive move is real earnings/news, but both vendors reconcile.				0.224528	0.224528
CB	2025-09-12		DISTRIBUTION	YF_MISSING_EVENT	Chubb \$0.97 regular quarterly cash dividend with September 2025 ex/record-date treatment and October 2025 payment. Chubb dividend records and independent dividend history confirm a regular \$0.97 quarterly dividend with September 2025 ex/record-date treatment and October 2025 payment. No split, spin-off, merger, rights offering, or separate material news catalyst was identified for the date. Input row math supports Massive: ms_return -0.013514 versus yf_return -0.016897, diff_return 0.003383, Massive has ms_div_split cd:0.97 while yFinance has no marker, and ms_return_div_split_explicit impact 0.003429 / implied 0.003441 reconcile to expected_return_impact 0.003429. yFinance event fields are 0.0, so yFinance omits the cash distribution and Massive is economically correct.		cd:0.97		-0.013514	-0.016897
CB	2025-12-12		DISTRIBUTION	YF_MISSING_EVENT	Chubb \$0.97 regular quarterly cash dividend with 2025-12-12 record/ex-dividend treatment and 2026-01-02 payment. Chubb announced on 2025-11-20 that its board declared a \$0.97 quarterly dividend payable 2026-01-02 to shareholders of record at close of business on 2025-12-12, and Chubb dividend history independently lists declared 2025-11-20, record 2025-12-12, payable 2026-01-02, amount \$0.97. No split, spin-off, merger, rights offering, or separate material news catalyst was identified for the date. Input row math supports Massive: ms_return 0.011344 versus yf_return 0.008138, diff_return 0.003206,		cd:0.97		0.011344	0.008138

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Massive has ms_div_split cd:0.97 while yFinance has no marker, and ms_return_div_split_explicit impact 0.003170 / implied 0.003180 reconcile to expected_return_impact 0.003170. yFinance event fields are 0.0, so yFinance omits the cash distribution and Massive is economically correct.					
CMCSA	2021-09-14		NEWS	HIGH_SCORE_ANOMALY	Comcast fell after management warned of slowing broadband subscriber additions. News sources reported Comcast shares fell on 2021-09-14 after CFO Mike Cavanagh warned at an investor conference that broadband subscriber growth had slowed and Q3 additions would be weaker. No split, cash distribution, spin-off, merger, or rights event was identified for the date. Input row math shows Massive and yFinance are economically equivalent: ms_return -0.073037 and yf_return -0.073036, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. The material decline is real broadband-guidance news, but Massive and yFinance both capture the same return.				-0.073037	-0.073036
CMCSA	2024-03-12		UNKNOWN	CLOSE_REVERSAL	No material CMCSA-specific corporate event identified for the vendor difference. Reviewed historical pricing and Comcast news-release listings around 2024-03-12. No split, cash distribution, spin-off, merger, rights offering, or material company-specific news explaining a vendor difference was identified for this date. Input row math shows Massive ms_return -0.008153 and yFinance yf_return -0.008038, immaterial diff_return -0.000115, no event markers for Massive or yFinance, and all event-return fields at 0.0. The row appears to be a benign close-source/rounding or reversal artifact, so BOTH are economically defensible.				-0.008153	-0.008038
CMCSA	2024-03-13		UNKNOWN	CLOSE_REVERSAL	No material CMCSA-specific corporate event identified for the vendor difference. Reviewed historical pricing and Comcast news-release listings around 2024-03-13; this row offsets the prior day small close difference. 					distribution, spin-off, merger, rights offering, or material company-specific news explaining a vendor difference was identified for 2024-10-22. Input row math shows Massive ms_return 0.025043 and yFinance yf_return 0.025167, immaterial diff_return -0.000123, no event markers for Massive or yFinance, and all event-return fields at 0.0. The row appears to be a benign close-source/rounding or reversal artifact, so BOTH are economically defensible.					
CMCSA	2024-10-23		UNKNOWN	CLOSE_REVERSAL	No material CMCSA-specific corporate event identified for the vendor difference. Reviewed historical pricing and the next Comcast earnings release timing; the small difference offsets the prior day close-source effect. No split, cash distribution, spin-off, merger, rights offering, or material company-specific news explaining a vendor difference was identified for 2024-10-23. Input row math shows Massive ms_return 0.000120 and yFinance yf_return 0.000000, immaterial diff_return 0.000120, no event markers for Massive or yFinance, and all event-return fields at 0.0. The row appears to be a benign close-source/rounding or reversal artifact, so BOTH are economically defensible.				0.00012	0.0
CMCSA	2024-12-09		NEWS	HIGH_SCORE_ANOMALY	Comcast warned of more than 100,000 Q4 broadband subscriber losses, triggering a material stock decline. CNBC and Reuters/Investing.com reported Comcast shares sold off on 2024-12-09 after management said Q4 broadband subscriber losses would exceed 100,000 amid intense competition and hurricane impacts. No split, cash distribution, spin-off, merger, or rights event was identified for this date. Input row math shows Massive and yFinance agree: ms_return -0.095017 equals yf_return -0.095017, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. This was a real news-driven stock move, but not a Massive versus yFinance discrepancy.				-0.095017	-0.095017
CMCSA	2025-01-30		NEWS	HIGH_SCORE_ANOMALY	Comcast Q4 2024 earnings reaction focused on worse-than-expected broadband subscriber losses and Peacock concerns. Comcast reported Q4 2024 results on 2025-01-30; CNBC reported the stock fell as broadband and Peacock subscriber metrics disappointed investors, while Reuters/Investing.com reported broadband customer losses exceeded expectations. No split, distribution, spin-off, merger, or rights event was identified. Input row math shows Massive and yFinance agree economically: ms_return -0.110011 equals yf_return -0.110011, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. The material decline is earnings/subscriber news, with BOTH vendors correct.				-0.110011	-0.110011

CMCSA	2025-10-31		UNKNOWN	CLOSE_REVERSAL	No material CMCSA-specific corporate event identified for the vendor difference. Comcast released Q3 2025 results on 2025-10-30, but no corporate action or event-return item was identified for 2025-10-31. No split, cash distribution, spin-off, merger, rights offering, or material company-specific news explaining a vendor difference was identified for this date. Input row math shows Massive ms_return 0.018851 and yFinance yf_return 0.019034, immaterial diff_return -0.000183, no event markers for Massive or yFinance, and all event-return fields at 0.0. The row appears to be a benign close-source/rounding or reversal artifact, so BOTH are economically defensible.				0.018851	0.019034
CMCSA	2025-11-03		UNKNOWN	CLOSE_REVERSAL	No material CMCSA-specific corporate event identified for the vendor difference. Reviewed Q3 2025 release context and historical pricing; the small difference reverses the prior close-source effect. No split, cash distribution, spin-off, merger, rights offering, or material company-specific news explaining a vendor difference was identified for 2025-11-03. Input row math shows Massive ms_return -0.030717 and yFinance yf_return -0.030891, immaterial diff_return 0.000174, no event markers for Massive or yFinance, and all event-return fields at 0.0. The row appears to be a benign close-source/rounding or reversal artifact, so BOTH are economically defensible.				-0.030717	-0.030891
CMCSA	2026-04-24		NEWS	HIGH_SCORE_ANOMALY	Comcast sold off after Q1 2026 results, analyst downgrade, and concerns about broadband competition and future EBITDA/free cash flow. Comcast reported Q1 2026 results on 2026-04-23, including improved broadband losses and record wireless additions, but lower net income/adjusted EBITDA. Motley Fool reported the stock fell almost 13% on 2026-04-24 after an analyst downgrade and broadband competition concerns. No split, cash distribution, spin-off, merger, or rights event was identified for this date. Input row math shows Massive and yFinance agree: ms_return -0.128951 equals yf_return -0.128951, diff_return is blank/immaterial, no event markers exist, and event-return fields are 0.0. The decline is post-earnings/news driven and BOTH vendors reconcile.				-0.128951	-0.128951
ETN	2024-02-01		NEWS	HIGH_SCORE_ANOMALY	Eaton Q4 2023 earnings and 2024 outlook drove a material positive stock reaction. Eaton reported Q4 2023 results before the open on 2024-02-01, including record adjusted EPS, record sales, strong organic growth, and 2024 adjusted EPS guidance above the prior-year result. No split, cash distribution, spin-off, merger, or rights event was identified for the date. Input row math shows Massive				0.075138	0.075138

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					and yFinance both at a +7.5138% price/adjusted return with no corporate-action mismatch, so the large move is explained by earnings/guidance news rather than a Massive-specific adjustment defect.					
ETN	2025-01-27		NEWS	HIGH_SCORE_ANOMALY	DeepSeek-related AI infrastructure selloff hit Eaton and other data-center power-equipment exposed stocks. External news on 2025-01-27 reported a DeepSeek-driven selloff in AI power and data-center infrastructure names as investors questioned future data-center electricity and equipment demand; Eaton was among the data-center power-equipment exposed names hit by the move. No split, cash distribution, spin-off, merger, or rights event was identified for the date. Input row math shows Massive and yFinance both at -15.5645% with no dividend/split event, so the return is a real market-news move and not a vendor discrepancy.				-0.155645	-0.155645
ETN	2025-11-05		DISTRIBUTION	MS_EVENT_DATE_MISMATCH	Eaton \$1.04 quarterly dividend around the November 2025 record/payment cycle; yFinance records the adjustment one trading day before the stronger ex-date evidence. Eaton declared a \$1.04 quarterly dividend payable 2025-11-21 to holders of record at close on 2025-11-06. Nasdaq/Dividend Channel explicitly stated ETN would trade ex-dividend on 2025-11-06, while a minority of dividend-history services list 2025-11-05. Input row math shows yFinance recognizes ca:1.04 on 2025-11-05, but Massive has no event that day and instead records cd:1.04 on 2025-11-06. Given the official record date, the post-T+1 same-day record/ex-date convention, and Nasdaq ex-date evidence, Massive is more likely correct and yFinance appears to have shifted the dividend one trading day early.			ca:1.04	0.020438	0.023256
ETN	2025-11-06		DISTRIBUTION	YF_EVENT_DATE_MISMATCH	Eaton \$1.04 quarterly dividend date mismatch; Massive records the adjustment on the stronger externally supported 2025-11-06 ex-date. Eaton declared a \$1.04 quarterly dividend payable 2025-11-21 to shareholders of record at close on 2025-11-06, and Nasdaq/Dividend Channel identified 2025-11-06 as the ex-dividend trading date. In the input row math, Massive records cd:1.04 on 2025-11-06 and the explicit/implied event impact reconciles closely, while yFinance has no event on this date because it recorded ca:1.04 on 2025-11-05. This is the correcting side of the adjacent-day mismatch; Massive is more likely correct for event timing, while yFinance appears to have shifted the dividend adjustment one trading day early.		cd:1.04		-0.01821	-0.020859
EXC	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source/rounding difference only.				0.000635	-0.001269

EXC	2025-10-27		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of the prior tiny close-source difference. No Exelon corporate action or material company-specific news was found for 2025-10-27. The input row math shows no dividend/split mismatch, identical adjustment factors, and Massive/yFinance closes both effectively 48.07; the small return difference reverses the 2025-10-24 half-cent close gap. This is a pricing-method artifact, not a real-world event.				0.000729	0.000625
FCX	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source difference only. No Freeport-McMoRan corporate action or material company-specific news was found for 2023-05-30. The input row math shows no dividend/split mismatch, unchanged adjustment factors, and a close-source difference: Massive close 34.44 versus yFinance close 34.23, creating a 0.6040 percentage-point return difference that reverses on 2023-05-31. This is a pricing-method/close-source artifact rather than a real event.				-0.009491	-0.015531
FCX	2023-05-31		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of prior close-source difference. No Freeport-McMoRan corporate action or material company-specific news was found for 2023-05-31. The input row math shows identical adjustment factors and no dividend/split event; Massive and yFinance closes agree at 34.34, while the return difference reverses the prior day close discrepancy. This is the reversal leg of a pricing-source artifact, not an economic event.				-0.002904	0.003214
FCX	2025-09-24		NEWS	HIGH_SCORE_ANOMALY	Freeport-McMoRan shares fell sharply after the Grasberg Block Cave accident update, force majeure, and reduced copper/gold sales guidance. Freeport provided a 2025-09-24 update on the Grasberg Block Cave mud-rush incident and third-quarter sales guidance, and AP reported that shares tumbled after the company expected lower copper and gold sales with much of the mine shut into the first half of 2026. The input row math shows Massive and yFinance both at -16.9533% with no corporate-action mismatch, so the large negative return is real news, not a vendor-specific adjustment problem.				-0.169533	-0.169533
GM	2024-10-22		NEWS	HIGH_SCORE_ANOMALY	GM shares rallied after Q3 2024 earnings beat expectations and management raised 2024 guidance. GM reported Q3 2024 results on 2024-10-22, beating Wall Street expectations and raising 2024 guidance. GM filings also show updated full-year guidance with Q3 revenue, net income, and EBIT-adjusted results. The input row math shows Massive and yFinance both				0.098099	0.098099

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					at +9.8099% with no corporate-action mismatch. The high-score anomaly is explained by earnings and guidance news, not a vendor-specific data error.					
GM	2025-10-21		NEWS	HIGH_SCORE_ANOMALY	GM shares surged after Q3 2025 earnings and raised full-year profit guidance. On 2025-10-21, GM raised its 2025 profit outlook after Q3 results and a better tariff-cost view; Reuters coverage reported the stock surged about 15%, and Axios reported GM lifted adjusted EBIT guidance to \$12-\$13 billion from the prior \$10-\$12.5 billion range. The input row math shows Massive and yFinance both at +14.8621% with no distribution/split mismatch, so both sources reflect the real earnings-guidance rally.				0.148621	0.148621
ILMN	2022-01-11		NEWS	HIGH_SCORE_ANOMALY	Illumina rallied after a stronger-than-expected 2022 revenue outlook and demand commentary. On 2022-01-11, Illumina shares rose after the company issued a 2022 revenue outlook above consensus expectations and cited strong demand and new partnerships. The input row math shows Massive and yFinance both at +16.9813% with no dividend/split mismatch or adjustment-factor issue, so the high-score anomaly reflects a real news-driven move rather than a vendor-specific corporate-action error.				0.169813	0.169813
ILMN	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source difference only. No Illumina corporate action or material company-specific news was found for 2023-05-30. The input row math shows no dividend/split mismatch and no adjustment-factor difference, but Massive and yFinance use materially different close levels, creating a 1.1971 percentage-point return difference that reverses on 2023-05-31. This is a pricing-source/close methodology artifact, not an economic event.				0.004926	-0.007045
ILMN	2023-05-31		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of the prior close-source difference. No Illumina corporate action or material company-specific news was found for 2023-05-31. The input row math again shows no corporate-action mismatch; the return difference is the reversal leg of the prior day close-source gap. No Massive dividend/split fix is indicated for this row.				-0.001041	0.011002
ILMN	2025-10-31		NEWS	HIGH_SCORE_ANOMALY	Illumina shares surged after Q3 2025 results exceeded guidance and management raised full-year outlook. Illumina reported Q3 2025 results after the prior close, saying revenue and earnings exceeded the high end of guidance, and external earnings coverage cited a				0.247753	0.247753

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Q3 beat plus raised full-year 2025 revenue and EPS outlook. The input row math shows Massive and yFinance both at +24.7753% with no corporate-action mismatch, so the large positive return is a real earnings/guidance reaction.					
IP	2024-10-31		NEWS	HIGH_SCORE_ANOMALY	International Paper shares rallied after Q3 2024 results and improved packaging outlook commentary. International Paper reported Q3 2024 results on 2024-10-31, with adjusted earnings above its outlook, higher pricing, and improving box demand commentary. External earnings coverage also cited adjusted EPS above guidance plus a positive Q4 packaging outlook from price flow-through and lower outages. The input row math shows Massive and yFinance both at +13.2776% with no corporate-action mismatch, so the high-score anomaly is explained by earnings/news rather than a data-source adjustment issue.				0.132776	0.132776
IQV	2023-05-30		PRICING_METHOD OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source difference only. No IQVIA corporate action or material company-specific news was found for 2023-05-30. The input row math shows no dividend/split mismatch and identical adjustment factors, but Massive close 201.65 differs from yFinance close 198.65, creating a 1.5041 percentage-point return difference that reverses on 2023-05-31. This is a close-source/pricing-method artifact, not a real event.				0.01103	-0.004011
IQV	2023-05-31		PRICING_METHOD OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of prior close-source difference. No IQVIA corporate action or material company-specific news was found for 2023-05-31. The input row math shows no corporate-action mismatch; Massive and yFinance closes converge near 196.91, and the return difference reverses the prior day close gap. This indicates a pricing-source artifact rather than an economic event.				-0.023506	-0.008759
IQV	2024-02-14		NEWS	HIGH_SCORE_ANOMALY	IQVIA rallied after Q4 2023 results and 2024 guidance were better received than expected. IQVIA reported Q4 and full-year 2023 results on 2024-02-14 and issued 2024 guidance. External coverage cited Q4 revenue above consensus and full-year 2024 guidance. The input row math shows Massive and yFinance both at +13.0998% with no corporate-action mismatch, so the high-score anomaly is explained by earnings/guidance news.				0.130998	0.130998
IQV	2026-02-03		NEWS	HIGH_SCORE_ANOMALY	IQVIA fell with data, professional-services, software, and CRO-linked stocks amid AI-disruption concerns. Reuters coverage on 2026-02-03 described a broad				-0.118756	-0.118756

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					selloff in data analytics, professional services, and software companies driven by investor concern that new AI tools could disrupt those businesses; later Reuters coverage specifically discussed AI-led pressure on contract research organizations including IQVIA. The input row math shows Massive and yFinance both at -11.8756% with no corporate-action mismatch, so the move is a real market/sector news reaction rather than a vendor-specific data problem.					
JCI	2023-08-02		NEWS	HIGH_SCORE_ANOMALY	Johnson Controls fell after fiscal Q3 2023 earnings and Q4 guidance were digested by investors. Johnson Controls reported fiscal Q3 2023 results and initiated Q4 guidance on 2023-08-02. External market coverage and price action show JCI traded down sharply after the release despite revenue and EPS growth. The input row math shows Massive and yFinance both at -9.2532% with no corporate-action mismatch, so the high-score anomaly is a real earnings/guidance reaction rather than a vendor-specific adjustment issue.				-0.092532	-0.092532
JCI	2024-05-01		NEWS	HIGH_SCORE_ANOMALY	Johnson Controls fell after fiscal Q2 2024 results, with investors focusing on below-expectation sales. Johnson Controls reported fiscal Q2 2024 results on 2024-05-01, maintaining FY24 guidance but reporting flat sales and adjusted EPS of \$0.78. External coverage attributed the stock decline to sales being below expectations despite the earnings beat. The input row math shows Massive and yFinance both at -7.0693% with no corporate-action mismatch, so the move is earnings/news-driven.				-0.070693	-0.070693
JCI	2024-11-06		NEWS	HIGH_SCORE_ANOMALY	Johnson Controls rallied after strong fiscal Q4 2024 results and FY25 guidance. Johnson Controls reported fiscal Q4 and FY24 results on 2024-11-06, including Q4 sales growth, organic sales growth, adjusted EPS, strong backlog, and FY25 guidance. External coverage reported the stock rose nearly 9% on better-than-expected results. The input row math shows Massive and yFinance both at +8.8298% with no corporate-action mismatch.				0.088298	0.088298
JCI	2025-02-05		NEWS	HIGH_SCORE_ANOMALY	Johnson Controls shares rallied after strong fiscal Q1 2025 results. Johnson Controls reported strong fiscal Q1 2025 results after the prior close, including operating margin expansion, EPS growth, and continued operating momentum. External earnings coverage reported both earnings and revenue ahead of estimates. The input row math shows Massive and yFinance both at +11.2822% with no corporate-action mismatch, so this is a real earnings reaction.				0.112822	0.112822
JCI	2025-09-22		DISTRIBUTION	YF_MISSING_EVENT	Johnson Controls \$0.40 quarterly dividend associated with the 2025-09-22 record/ex-dividend date.		cd:0.4		0.009234	0.00552

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Johnson Controls approved a \$0.40 quarterly dividend payable 2025-10-17 to shareholders of record at close on 2025-09-22, and dividend-history sources list a \$0.40 dividend with 2025-09-22 ex-dividend date. The input row math shows Massive records cd:0.4 while yFinance records no event, and the return difference is approximately the \$0.40 distribution effect. Massive is more likely correct for recognizing the distribution on this row.					
JCI	2025-12-22		DISTRIBUTION	YF_MISSING_EVENT	Johnson Controls \$0.40 quarterly dividend associated with the 2025-12-22 record/ex-dividend date. Johnson Controls approved a \$0.40 quarterly dividend payable 2026-01-16 to shareholders of record at close on 2025-12-22, and dividend-history sources list 2025-12-22 as the ex-dividend date with a \$0.40 amount. The input row math shows Massive records cd:0.4 while yFinance records no event; the return difference reconciles to the distribution amount. Massive is more likely correct for this audited row.		cd:0.4		0.006967	0.003597
MRK	2021-10-01		NEWS	HIGH_SCORE_ANOMALY	Merck rallied after positive molnupiravir COVID-19 antiviral trial data. On 2021-10-01, Merck and Ridgeback reported that molnupiravir reduced COVID-19 hospitalization or death risk by about 50% in interim Phase 3 data, a major positive antiviral development. The input row math shows Massive and yFinance both at +8.3744% with no corporate-action mismatch, so the high-score anomaly reflects real drug-trial news.				0.083744	0.083744
MRK	2021-11-05		NEWS	HIGH_SCORE_ANOMALY	Merck fell sharply as Pfizer’s stronger COVID antiviral news pressured expectations for molnupiravir. Pfizer announced on 2021-11-05 that its COVID antiviral pill cut hospitalization or death risk sharply, pressuring expectations for Merck molnupiravir. Later sector coverage noted that date as Merck’s prior daily drop of at least 9% before the 2024 Gardasil selloff. The input row math shows Massive and yFinance both at -9.8630% with no corporate-action mismatch, so the move is a real competitive-drug news reaction rather than a data issue.				-0.09863	-0.09863
MRK	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source difference only. No Merck corporate action or material company-specific news was found for 2023-05-30. The input row math shows no dividend/split mismatch and identical adjustment factors, but Massive close 110.09 differs from yFinance close 109.17, creating a 0.8283 percentage-point return difference that reverses on 2023-05-31. This is a close-source/pricing-method artifact.				-0.008823	-0.017106

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
MRK	2023-05-31		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of prior close-source difference. No Merck corporate action or material company-specific news was found for 2023-05-31. The input row math shows no dividend/split mismatch; Massive and yFinance closes converge near 110.41, and the return difference reverses the prior day close gap. This is a pricing-source artifact, not an economic event.				0.002907	0.011358
MRK	2024-07-30		NEWS	HIGH_SCORE_ANOMALY	Merck fell after Q2 2024 results highlighted weaker Gardasil sales in China and reduced adjusted profit guidance. Merck shares fell about 9% on 2024-07-30 despite Q2 earnings and revenue beats, as investors focused on lighter-than-expected Gardasil sales and a significant step-down in China shipments, along with lower adjusted profit guidance. The input row math shows Massive and yFinance both at -9.8059% with no corporate-action mismatch, so the high-score anomaly is a real earnings/product-sales news move.				-0.098059	-0.098059
PWR	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; close-source difference only. No Quanta Services corporate action or material company-specific news was found for 2023-05-30. The input row math shows no dividend/split mismatch and identical adjustment factors, but Massive close 179.435 differs from yFinance close 181.17, creating a 0.9971 percentage-point return difference that reverses on 2023-05-31. This is a close-source/pricing-method artifact.				0.031236	0.041207
PWR	2023-05-31		PRICING_METH OD	CLOSE_REVERSAL	No independently confirmed corporate action or material news event; reversal of prior close-source difference. No Quanta Services corporate action or material company-specific news was found for 2023-05-31. This is a pricing-source artifact, not an economic event.				-0.010338	-0.019816
PWR	2025-01-27		NEWS	HIGH_SCORE_ANOMALY	Quanta Services fell with AI power/infrastructure names during the DeepSeek-related data-center demand selloff. External coverage reported a broad DeepSeek-related selloff on 2025-01-27 as lower-cost AI models raised doubts about AI computing-power and data-center infrastructure demand; Reuters coverage described pressure in semiconductor, power, and infrastructure companies exposed to AI. The input row math shows				-0.183225	-0.183225

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Massive and yFinance both at -18.3225% with no corporate-action mismatch.					
PWR	2026-04-30		NEWS	HIGH_SCORE_ANOMALY	Quanta Services rallied after Q1 2026 earnings beat expectations and management raised 2026 guidance. Quanta Services reported Q1 2026 results on 2026-04-30, with strong revenue and adjusted EPS performance, record/backlog strength, and raised 2026 guidance; external coverage reported shares rose sharply after the announcement. The input row math shows Massive and yFinance both at +15.7763% with no corporate-action mismatch, so the move is a real earnings/guidance reaction.				0.157763	0.157763
QCOM	2021-11-04		NEWS	HIGH_SCORE_ANOMALY	Qualcomm rallied after fiscal Q4 2021 earnings beat expectations and strong forward guidance. QCOM rose about 12.7% in both Massive and yFinance input row math with no corporate-action mismatch. External research found Qualcomm shares up after fiscal Q4 2021 adjusted EPS and revenue beat expectations and the company issued strong Q1 FY2022 guidance; Qualcomm's release showed non-GAAP EPS of \$2.55 and Q1 outlook of \$2.90-\$3.10. The agreement between Massive and yFinance supports a real news move, not a vendor defect.				0.127311	0.127311
QCOM	2023-05-30		PRICING_METH OD	CLOSE_REVERSAL	No material company event found; apparent May 30 close-method discrepancy before the May 31 dividend adjustment. The input row math shows a one-day close discrepancy: Massive close 114.835 versus yFinance close 116.00, followed by near-identical closes on 2023-05-31 and a normal \$0.80 dividend adjustment. External price and dividend tables around May 2023 show the economically relevant unadjusted close in the same area and no split, merger, spin-off, or material company news on 2023-05-30. This is best treated as a vendor pricing/close-method discrepancy that reverses, with no real-world event required.				0.040643	0.051201
QCOM	2023-05-31		DISTRIBUTION	CLOSE_REVERSAL	Qualcomm traded ex-dividend for a regular quarterly \$0.80 cash dividend. Both vendors record the same \$0.80 dividend in the input row, with Massive cd:0.8 and yFinance ca:0.8, and input row math shows only a residual close reversal from the prior-day pricing discrepancy. External dividend sources confirm QCOM had a \$0.80 ex-dividend date on 2023-05-31, payable June 22, 2023. The dividend is real and both vendors capture the corporate action; the return difference is from the prior close method rather than an incorrect dividend.		cd:0.8	ca:0.8	-0.005481	-0.015538
QCOM	2025-04-09		NEWS	HIGH_SCORE_ANOMALY	QCOM participated in the broad U.S. equity and technology rally after the April 9, 2025 tariff-pause announcement.				0.151853	0.151853

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					QCOM gained about 15.2% in both Massive and yFinance input row math, with no split or distribution mismatch. External research found a broad April 9, 2025 market surge after the U.S. announced a 90-day pause on many reciprocal tariffs, with technology and risk assets sharply rebounding. I found no QCOM-specific corporate action on the date, so the move is a macro/news-driven market rebound captured consistently by both sources.					
QCOM	2025-10-27		NEWS	HIGH_SCORE_ANOMALY	Qualcomm shares rallied after announcing AI200/AI250 data-center AI inference chips and a HUMAIN AI infrastructure collaboration. Massive and yFinance both show an approximately 11.1% QCOM gain with no corporate action. External research found Qualcomm announced AI200/AI250 data-center inference chips and a HUMAIN collaboration to deploy AI infrastructure in Saudi Arabia; Reuters/Investing.com reported the shares surged on the data-center AI chip push. Both vendors consistently capture the news-driven repricing.				0.110927	0.110927
QCOM	2026-04-30		NEWS	HIGH_SCORE_ANOMALY	Qualcomm rallied after fiscal Q2 2026 results and optimistic smartphone and data-center commentary despite softer Q3 guidance. Both Massive and yFinance input row math show a roughly 15.1% QCOM gain with no distribution or split. Qualcomm's fiscal Q2 2026 release reported results and management commentary, while Reuters/Investing.com reported shares jumped as optimism about smartphone recovery and data-center opportunities outweighed a weak Q3 forecast. The matching vendor returns and external event evidence support a real earnings/news move.				0.151154	0.151154
STE	2023-02-09		NEWS	HIGH_SCORE_ANOMALY	STERIS sold off after fiscal Q3 2023 results, softer revenue growth outlook, and reduced adjusted EPS/free-cash-flow expectations. The input row math shows STE down about 10.9% in both Massive and yFinance with no dividend or split mismatch. External research found STERIS reported fiscal Q3 2023 results after the prior close, lowered fiscal 2023 revenue growth expectations, lowered constant-currency organic revenue growth expectations, and guided adjusted EPS to \$8.00-\$8.10. The matched vendor returns support a real earnings/guidance selloff.				-0.108918	-0.108918
STE	2025-11-18		DISTRIBUTION	YF_MISSING_EVENT	STERIS had a \$0.63 quarterly cash dividend associated with the November 18, 2025 dividend date. The input row shows Massive carrying cd:0.63 while yFinance has no dividend/split action, producing a roughly 0.2457% adjusted-return difference. External research confirms STERIS announced a \$0.63 quarterly dividend payable December 18, 2025 to shareholders of record at the close of business on		cd:0.63		0.002418	-3.9e-05

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					November 18, 2025, and dividend-history sources list a \$0.63 ex-dividend date on November 18, 2025. Massive therefore correctly reflects the cash distribution in the row; yFinance appears to omit the action field for this date.					
T	2021-07-08		DISTRIBUTION	EVENT_DENOMINATOR_MISMATCH	AT&T traded ex-dividend for a regular quarterly \$0.52 cash dividend. Both Massive and yFinance input fields record the same \$0.52 AT&T cash dividend, but the input row math uses different prior-close denominators because the price histories are on different bases. External research confirms T traded ex-dividend on July 8, 2021 for a \$0.52 dividend payable August 2, 2021. For this row, both vendors calculated the event impact consistently on their own prior-close denominator basis. The raw price returns are effectively the same, so the adjusted-return gap comes from the prior-close denominator basis, not from a missing, extra, or misstated event.		cd:0.52	ca:0.52	-0.008096	-0.002178
T	2021-10-07		DISTRIBUTION	EVENT_DENOMINATOR_MISMATCH	AT&T traded ex-dividend for a regular quarterly \$0.52 cash dividend. Both vendors record a \$0.52 dividend in the input row, while the input row math shows different dividend-return percentages due to different prior-close denominators. AT&T investor records list the 2021 dividend payable November 1, 2021 with October 11 record date and \$0.52 amount, and dividend-history sources list October 7, 2021 as the ex-dividend date. For this row, both vendors calculated the event impact consistently on their own prior-close denominator basis. The raw price returns are effectively the same, so the adjusted-return gap comes from the prior-close denominator basis, not from a missing, extra, or misstated event.		cd:0.52	ca:0.52	0.011198	0.017598
T	2022-01-07		DISTRIBUTION	EVENT_DENOMINATOR_MISMATCH	AT&T traded ex-dividend for a regular quarterly \$0.52 cash dividend. The input row shows Massive cd:0.52 and yFinance ca:0.52, with the adjusted-return difference coming from different prior-close denominators rather than event presence. External sources confirm AT&T had a \$0.52 ex-dividend date on January 7, 2022, declared in December 2021 and paid February 1, 2022. For this row, both vendors calculated the event impact consistently on their own prior-close denominator basis. The raw price returns are effectively the same, so the adjusted-return gap comes from the prior-close denominator basis, not from a missing, extra, or misstated event.		cd:0.52	ca:0.52	0.027354	0.034163
T	2023-04-20		NEWS	HIGH_SCORE_ANOMALY	AT&T shares fell after Q1 2023 results showed weak free cash flow and softer-than-expected revenue. Massive and yFinance input row math both show T down about 10.4% with no corporate-action				-0.104061	-0.104061

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					mismatch. External research found AT&T reported Q1 2023 results on April 20, 2023 with free cash flow of \$1.0 billion, materially below market expectations, and CNBC reported shares sank after softer-than-expected revenue and cash flow. Matching vendor returns and the external news support a real earnings/cash-flow-driven selloff.					
TEL	2025-07-23		NEWS	HIGH_SCORE_ANOMALY	TE Connectivity rallied after fiscal Q3 2025 earnings beat expectations and management issued strong fourth-quarter guidance. Both Massive and yFinance input row math show TEL up about 12.0% with no corporate-action mismatch. TE Connectivity reported fiscal Q3 2025 sales of \$4.53 billion and adjusted EPS of \$2.27, with double-digit sales and EPS growth and upbeat Q4 guidance; Reuters/Investing.com reported profit and revenue beat estimates and the company projected a robust fourth quarter. The matched returns support a real earnings/news rally.				0.119521	0.119521
TEL	2025-11-21		DISTRIBUTION	YF_MISSING_EVENT	TE Connectivity had a \$0.71 quarterly cash dividend associated with the November 21, 2025 dividend date. The input row shows Massive carrying cd:0.71 while yFinance has no dividend/split action, creating a roughly 34 bp adjusted-return difference. External research confirms TE Connectivity declared a \$0.71 quarterly cash dividend payable December 12, 2025 to shareholders of record on November 21, 2025, and dividend-history sources list a \$0.71 ex-dividend date on November 21, 2025. Massive correctly captures the distribution; the yFinance action field appears omitted in this input row.		cd:0.71		0.02409	0.0207
TT	2025-12-05		DISTRIBUTION	YF_MISSING_EVENT	Trane Technologies had a \$0.94 quarterly cash dividend associated with the December 5, 2025 dividend date. Massive records cd:0.94 while yFinance has no action field, and the input row math shows the adjusted-return difference equals the dividend effect. External research confirms Trane Technologies declared a \$0.94 quarterly dividend payable December 31, 2025 to shareholders of record on December 5, 2025, and dividend-history data lists a \$0.94 ex-dividend date on December 5, 2025. Massive correctly captures the distribution; yFinance appears to omit the action field in this row.		cd:0.94		-0.007369	-0.009671
ULTA	2021-10-19		NEWS	HIGH_SCORE_ANOMALY	Ulta sold off after investor-day long-term targets for fiscal 2022-2024 disappointed investors. Massive and yFinance input row math both show ULTA down about 10.6% with no corporate-action mismatch. External research found Ulta announced 2022-2024 long-term targets at its investor conference, including 5%-7% net sales CAGR and 3%-5% annual comparable-sales growth; market				-0.10582	-0.10582

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					coverage reported the stock fell after those targets. Both vendors consistently capture the real investor-day/news selloff.					
ULTA	2023-05-26		NEWS	HIGH_SCORE_ANOMALY	Ulta shares fell after fiscal Q1 2023 results raised concerns about revenue, comparable-sales deceleration, and margins. Both Massive and yFinance show a 13.4% ULTA decline with no event mismatch. Ulta reported fiscal Q1 2023 results on May 25, 2023; external market coverage reported shares plunging after mixed results, slower comparable sales, and operating-margin concerns. The equal vendor returns support a real earnings/news selloff.				-0.133678	-0.133678
ULTA	2023-12-01		NEWS	HIGH_SCORE_ANOMALY	Ulta rallied after fiscal Q3 2023 results and an upward revision to annual guidance. Massive and yFinance both show ULTA up about 10.8% with no corporate action. Ulta reported fiscal Q3 2023 results after the prior close, and external coverage reported the shares jumped after the company lifted the lower end of annual guidance on solid demand. Both sources capture a real earnings/guidance rally.				0.108078	0.108078
ULTA	2024-04-03		NEWS	HIGH_SCORE_ANOMALY	Ulta sold off after management warned of slowing beauty demand and lackluster first-quarter trends. Both vendors show ULTA down about 15.3% with no corporate-action mismatch. CNBC and Reuters/Investing.com reported Ulta shares fell sharply after management warned that beauty demand was cooling earlier and more than expected, dragging beauty peers lower. This was a real management-commentary/news-driven selloff captured consistently by Massive and yFinance.				-0.153364	-0.153364
ULTA	2025-03-14		NEWS	HIGH_SCORE_ANOMALY	Ulta rallied after fiscal Q4 2024 results came in better than feared despite cautious fiscal 2025 guidance. Massive and yFinance both show ULTA up about 13.7% with no corporate action. Ulta reported fiscal Q4 2024 results after the prior close, and external coverage said the company delivered better-than-expected results while investors had braced for worse. The matched returns support a real earnings relief rally.				0.13677	0.13677
ULTA	2025-05-30		NEWS	HIGH_SCORE_ANOMALY	Ulta rallied after fiscal Q1 2025 results beat expectations and management raised fiscal 2025 guidance. Both vendor returns show ULTA up about 11.8% with no corporate-action mismatch. Ulta announced fiscal Q1 2025 results and updated fiscal 2025 guidance; external coverage reported EPS of \$6.70 beat expectations and the company raised full-year EPS and comparable-sales guidance, sending shares				0.11776	0.11776

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					higher. Massive and yFinance consistently capture the earnings/guidance rally.					
ULTA	2025-12-05		NEWS	HIGH_SCORE_ANOMALY	Ulta rallied after fiscal Q3 2025 results beat expectations and management raised the full-year outlook. Massive and yFinance both show ULTA up about 12.7% with no corporate action. Ulta reported fiscal Q3 2025 results after the prior close; external coverage reported EPS and revenue above estimates, 6.3% comparable-sales growth, and a raised full-year outlook on strong makeup and skincare demand. This is a real earnings/guidance rally.				0.12651	0.12651
ULTA	2026-03-13		NEWS	HIGH_SCORE_ANOMALY	Ulta sold off after fiscal Q4 2025 results and fiscal 2026 guidance raised margin and cost concerns. Both vendors show ULTA down about 14.2% with no corporate-action mismatch. Ulta reported fiscal Q4 and fiscal 2025 results and issued fiscal 2026 guidance; external coverage reported shares fell as rising costs deepened margin fears and profit guidance disappointed relative to expectations. This was a real earnings/guidance selloff captured by both sources.				-0.142436	-0.142436
ZBH	2024-09-05		NEWS	HIGH_SCORE_ANOMALY	Zimmer Biomet sold off after disclosing ERP transition problems that were expected to slow shipments and pressure 2024 sales and earnings. Massive and yFinance both show ZBH down about 8.7% with no corporate action. Zimmer Biomet had scheduled its Wells Fargo Healthcare Conference presentation for September 5, 2024, and external market coverage reported shares dropped after management disclosed ERP transition challenges expected to create a roughly 1% full-year sales headwind and pressure 2024 earnings. Both vendors capture the real news-driven selloff.				-0.087439	-0.087439
ZBH	2025-05-05		NEWS	HIGH_SCORE_ANOMALY	Zimmer Biomet fell after Q1 2025 results included lowered full-year adjusted EPS guidance tied to acquisition, currency, and tariff impacts. Both Massive and yFinance input row math show ZBH down about 11.6% with no event mismatch. Zimmer Biomet reported Q1 2025 results and updated full-year 2025 guidance, lowering adjusted EPS guidance to \$7.90-\$8.10 from \$8.15-\$8.35 after including Paragon 28, currency, and tariff proposal impacts. External coverage reported shares tumbled after the lowered EPS outlook. This is a real earnings/guidance selloff.				-0.116234	-0.116234
ZBH	2025-11-05		NEWS	HIGH_SCORE_ANOMALY	Zimmer Biomet sold off after Q3 2025 results, narrowed organic revenue guidance, and concerns about emerging-market distributor order cancellations.				-0.151483	-0.151483

ticker	date	massive fix priority	event bucket	analysis reason code	real world evidence	massive problem and fix	Massive ms_div_split	yFinance yf_div_split	Massive ms_return	yFinance yf_return
					Massive and yFinance both show ZBH down about 15.1% with no corporate-action mismatch. Zimmer Biomet reported Q3 2025 results and narrowed full-year constant-currency and organic constant-currency revenue growth guidance; later investor-action coverage described the same-day share-price drop of about \$15.63, or 15%, after reduced top-line expectations and emerging-market distributor-order issues. The matching vendor returns support a real earnings/guidance selloff.
